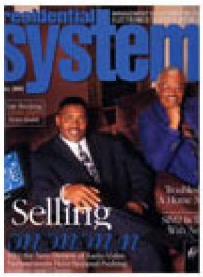
Vista



F.

F. Buena VISTA. BDI's new VISTA plasma TV stand is one of the few stands to take the plasma off of the wall. The VISTA is supported at the optimal viewing height and cable and connections are securely connected within the stand's support structure. The VISTA also features a solid steel construction and a large footprint, and can accommodate plasmas up to 50 inches. Optional shelves (available in two sizes) can be added to customize the stand into multiple configurations. Visit BDI at www.bdiusa.com.
