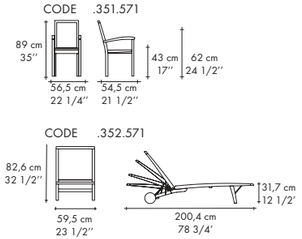
HASTE TRADE & DESIGN

MERLIN batyline®



HASTE GARDEN is a brand of furniture for contract use in hotels, outdoor restaurants and cafeterias. The designs of either wooden furniture on metal frames or all wood furniture are an attractive option for terraces, hotel balconies and recreational rooms in spa & wellness facilities.

Our furniture will emphasize the character and style of an interior, both in classic as well as modern looks. HASTE GARDEN FURNITURE is selected to add to the overall beauty of an interior.

MERLIN - is an elegant option for enthusiasts of dining outdoors.
A captivating combination of Batyline® and reliable robinia will assure comfort and longevity.
Practical as well as glamorous in one, the armchairs are stackable as well as having eye-catching design.
MERLIN armchairs are ideal for a very comfortable setting around a dining table area.

Merlin lounger can be used for relaxing, napping or sunbathing. It does not need a cushion for extra comfort and dries immediately after rain to ensure no sunny moment is missed!

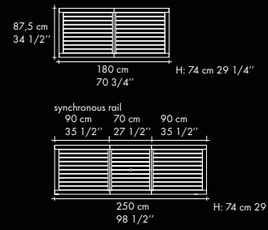
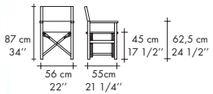
CODE .549.571



The simple rectangular tables 150x90, 160x80, 160x90, or 180x87,5 are appropriate for 6 persons.
The extending table 180/250x87,5 can accommodate up to 8 persons.
The table top slides on a synchronous rail to fold out the self-storing leaf.

POLO

CODE .710.571



POLO director's chair is a very stable lightweight chair that folds side-to-side with a scissors action. It is an excellent design - simple and ideally suited to its function – and it goes back to coffer-makers' chairs of the 15th century and eventually to the Roman curule chair.

The seat and back are made of strong Batyline ® fabric which bears the user's full weight and can be folded; the frame is made of robinia wood. The seat and scissors members work together to support and distribute the sitter's weight so that the seat is comfortably taut. Our choice of materials makes POLO one of the best and most stable director's chairs on the market.

Different colours of Batyline ® are available on request.

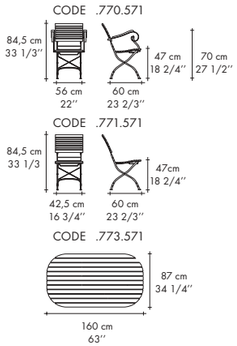
ROSALIE



In ROSALIE collection exclusive classical form is married to the frame in fashionable purple violet colour. On special request other colours are available. Built from superbly durable powder coated steel, our series ROSALIE will last and last.

The curves of stylish steel are matched with comfortably curved slats of hardwood robinia. The chair is available with and without armrests. Each item is foldable - an idea for restaurants and other locations where the furniture needs to be brought in and out on a daily basis.

During the 19th century gardens and parks became more popular resulting in the creation of furniture especially suitable for outdoor use. Today the REBECCA collection shows the spirit of this era. This stylish set is perfect for sidewalk cafés, residential balconies, patios and breakfast nooks.

The metal black frames are elegant, well composed with warm colour of solid robinia wood. All items are foldable.

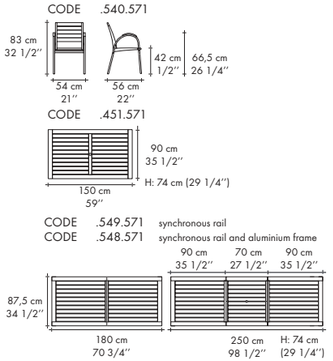
ARABELLA



ARABELLA creates an inviting dining spot wherever you place it.

The ARABELLA stacking chairs have a gently contoured back and seat in robinia hardwood, combined with an aluminium frame.
Sturdy slats tip back gently for comfortable seating.
The design and quality are visible in every detail of the chair and dining table set.
To complete the set we recommend a table with butterfly extension and aluminium frame which perfectly matches the armchairs.

MARIS

CODE .560.571

CODE .561.571

MARIS collection of modern design furniture offers a great solution for contemporary outdoor living or interior use.

The dining chairs and the table are minimalist in design. Slanted backrest of the chair provide optimum comfort to this luxury garden furniture range and the original composition of wider and thinner slats of the table top and the chair's seat and backrest add to pure modern design.

Built to a very high quality using European robinia hardwood in oil finish, MARIS is designed for year-round exterior style, a choice for both private villas and residences as well as an ideal commercial outdoor furniture solution for restaurants, bistros and hotels.

The chairs are stackable, for where space is at a premium but contemporary style remain a priority.

RIVIERA

Due to its ergonomically curved design, RIVIERA group offers excellent comfort. Chairs, love seats and 3-seat benches can be combined with RIVIERA recliners to create a variety of dining and relaxed-group settings.

RIVIERA recliner with gently-angled slats adjusts to five positions.

Copyright HASTE TRADE & DESIGN

The RIVIERA chaise lounge in robinia retains its natural pure beauty in the face of time and weather. The slated backrest adjusts to four and a leg support section to two positions. When flat, the piece becomes a comfortable bench. The wheels allow it to move easily.

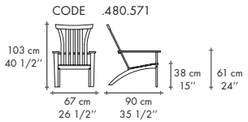
GRACE chair and footrest have a particularly elegant and unforgettable design which resembles the shape of a blooming flower. Relax in this unique, comfortable summer seating. Superbly crafted of solid robinia, GRACE rocker is destined to last for generations, whether placed on a porch, out under the stars, or inside next to the fireplace.

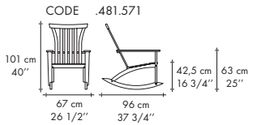
Robinia pseudoacacia, commonly known as the Black Locust

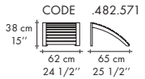
Robinia tree was introduced at the beginning of the 17th century to Europe.
The original home was the North American East.
Today it is found in the middle and South of Europe.

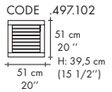
Robinia is a compact wood, one of the heaviest of all wood in Europe, much harder than oak. Accordingly the wood is very hard and at the same time it is also very tough combined with a high elasticity. Robinia is naturally resistant to decay and it is the only European wood that is in resistance class 1.

Because of its good material qualities it can be used in many ways.
In the past it was used many times as fencing poles.
With increasing industrialization a new interest was found in the economic viability of the tree. It can be used in situations where high mechanical demands and extreme environment conditions come together, for example for excavation of the ground and waterways construction e.g. watermills, canals, shipbuilding, docks, bridges, barrels, mineshaft, etc. Beside its hardness, resistance and elasticity, robinia wood is also very decorative what makes it handsome and valuable material for production of outdoor furniture.









WINTER GARDENS

Origins of winter gardens

It is difficult to say the exact period of appearance and construction of winter gardens and greenhouses.
It is known, that already in Ancient Rome houses' atriums were decorated with flowering plant in hanging pots, and for cultivation of vegetables and exotic plants Romans built hothouses.
In northern countries of the European continent cultivation of heat-loving plants was impossible in open ground conditions.
The origin of a modern winter garden dates back to the 17th to 19th centuries where European nobility would construct large conservatories that would house tropical and subtropical plants and would act as an extension of their living space.
Many of these would be attached to their main palaces.
Earlier versions would be constructed of masonry with large windows and a glass roof, usually in the Classical or Gothic styles.
While in the 19th century many of these conservatories were made out of iron and curvilinear glass.
Nowadays a winter garden is usually a part of a living room where plants will serve as living decoration all winter and furnishing of this place is treated with the same great care as interior decoration of the rest of the house.

Decorating of a winter garden requires individual arrangement. Depending on the equipment of the house, the winter garden can be furnished with a table and chairs which make a dining set of furniture or with comfortable sofas or armchairs with stools. In HASTE GARDEN collection you can find wooden furniture with thick cushions designed especially for winter gardens and roofed terraces. We highly recommend you our comfortable sets MALIBU, KAMEA and MONACO. Having different styles, they can be used to equip both modern and classic living spaces. Thanks to its natural features, robinia is a perfect kind of wood for places with significant changes of temperature and humidity.

Copyright HASTE TRADE & DESIGN

KAMEA corner grouping is a great extension of your living room.
Entertain yourself, your dearest, and your guests seated comfortably.

KAMEA chair, available also with armrests, love seat, corner chair and footrest, each provided with extra thick cushions, were shaped to make you enjoy any occasion. All cushions covers are easy to unzip for washing.

To complete the set you can choose a small square side table, a rectangular coffee table or you can set together two coffee tables.

CUSHIONS

Outdoor cushions can easily make the garden or terrace a more livable space, not only during cool summer nights, when we feel warmer and more pleasant while seating on a soft pillow. The more comfortable the seating is the more likely you are to use your garden or terrace frequently and maximize your enjoyment of the space treating it as an outdoor living room.

Outdoor cushions from HASTE GARDEN collection are made according to the highest quality standards and are manufactured of materials specifically designed for outdoor use to reduce the maintenance required. The covers are made of DRALON, acrylic fabric that is very durable and unlike cotton will not easily fade and will last longer when exposed to sun, wind and light rain. It is resistant to dirt and drizzle and dries faster, absorbing small portions of water. The fabric is also more resistant to wear and pleasant when touched. The colour range is 14 elegant plain colours that add to the ambience of the patio and complement outdoor scenery. The filling is high durability foam and silicon.

The cushions that fit into dining chairs, benches, lounge chairs, ottomans, love seats, 3-seater outdoor sofas and chaise lounges are offered with covers closed with zippers for easy removal for washing (maximum wash temperature 40°C, maximum ironing temperature 150°C, other details regarding maintenance are included in the care label).

FURNISHING A RESTAURANT, HOTEL AND SPA

No one knows exactly where the word spa comes from, but there are two main theories. One is that spa is an acronym for the Latin phrase, "salus per aquae", or "health through water". Others believe the origin of the word "spa" comes from the Belgian town of Spa, known since Roman times for its baths. They speculate that the town was so prominent that the very word spa became synonymous in the English language with a place to be restored and pampered. Modern spas have their roots in ancient towns famed for the healing powers of their mineral waters and hot springs. Travellers would come to "take the waters" and restore their health. The practice of bathing in hot springs and mineral waters dates at least to the Babylonians and Greeks, and knowing people, probably much sooner!
As evidence of the importance given to the therapeutic properties of water, during the Roman Empire great thermal buildings had been built and become a real social institution. In a few times, spa centres became also an occasion for meeting and cultural exchanges.
In that period, the beneficial concept of baths turned into a true therapeutic practice prescribed by the doctors in order to guarantee a longer and healthier life to their patients.

After the fall of the Roman Empire the splendour of "thermal culture" faded away because of the Barbaric invasions and the success of the Christian culture which did not accepted nudity nor promiscuity. When, in the Middle Ages, herbs and potions could not heal disease nor relieve pain, people had nothing to do but entrust the healing and purifying action of water, which gained again its lost therapeutic importance. Several kinds of water were classified, according to their composition and the single healing properties. During the Renaissance the discovery of printing improved the divulgation of information and consequently the use of hydro-treatments increased, even if the methods remained the medieval ones.

Starting from the XVIII century the development of medicine facilitated the analysis on water composition and guaranteed a scientific approach to therapies. Between the XIX and the XX centuries the fruition of spas was reserved to the privileged social class and only later this phenomenon extended to other classes too. Since the late 20th century the spa has increasingly focused on prevention, healthy lifestyles, fitness, spirituality and relaxation. With record numbers of people turning to the spa for some of their most important lifestyle pursuits, today's spa experience covers medical and spiritual programs to outdoor adventures and exotic travel. Recently spa-going has been described as a new cultural trend.

The spa aesthetic meanwhile, has broken out of the spa and into popular culture, influencing everything from fashion and cosmetics, to architecture, home décor, and cuisine.

What is so special about the materials that HASTE GARDEN uses?

All the wood used in the manufacture of our furniture is sourced from Europe. The features are a straight grain structure, the absence of knots, splits or cracks and an even overall colour.

What's so special about the way HASTE GARDEN makes its furniture?

HASTE GARDEN attention to detail is second to none. The easiest way to describe our attitude to design and finish is indoor production and quality standards combined with outdoor engineering and durability. All furniture is sanded with extra fine grades of sand paper to achieve a silky-smooth finish and we finish the underside of our furniture (i.e. the side that is never seen) to the same high standard as the top.

How easy is HASTE GARDEN furniture to assemble?

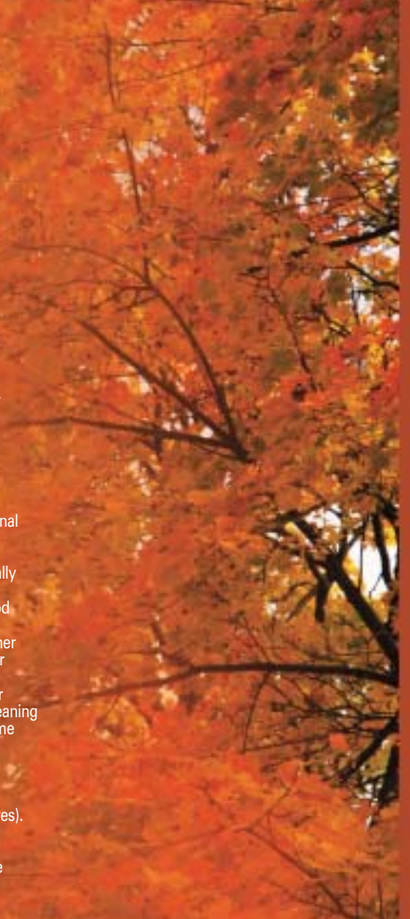
Most pieces of furniture are supplied either fully assembled or flat-packed in subassemblies to minimize the amount of final assembly required. All flat-packed items come complete with a pack of fittings and detailed, multi-lingual assembly instructions. Due to thoughtful design and the accuracy of our construction no glue is required when assembling the products, only the dowels and/or bolts supplied in the fittings pack. In most cases, a single person with only a minimum of tools can assemble the furniture within a few minutes.

Can my furniture be kept outside all year round?

Yes, Robinia Furniture can be kept outside all 12 months of the year. Of course, furniture left outside all year will get more dirty than furniture that is just used in the summer, but the long-term performance and durability of the furniture is exactly the same. In order for the furniture to sustain its original appearance, it is advisable to keep it in a shady area or place a protective furniture cover over it. If you want to store your furniture over the winter, we advise that you do so in a garden shed or garage. Do not move the furniture from the garden straight into a heated indoor room for storage, as the sharp differences in temperature and humidity may cause the wood to split.

How much maintenance will my furniture require?

Robinia does not require any special maintenance routine apart from occasional cleaning. If left to age naturally outside by being exposed to light, air and rain, then the surface of the wood will gradually change to a soft, silver-grey as the pigments in the surface layer of the wood start to fade away. We recommend that you simply allow your furniture to weather naturally this way and maintain the silver patina with regular, gentle cleaning with soft soap flakes dissolved in warm water (not detergent). However, if a regular cleaning regime is neglected, furniture can become badly weathered (grey-black in colour) or extremely dirty, in which case we recommend a cleaner and brighter designed to help restore the surface colour of the wood (available in DIY stores). In order to maintain original condition of furniture for as long as possible it is advised to place it under a roof or to use suitable furniture covers.



CUSHIONS

HASTE GARDEN cushions have been specially designed to give an added touch of opulence and comfort to our dining chairs, loungers and deep -seating items.

Cushions are tailored to fit each item of furniture perfectly and are available in a wide range of colours. All fabrics used are 100% solution dyed acrylic. As a result these fabrics not only feel soft and comfortable, but also retain their colour and strength while withstanding mildew, chlorine, atmospheric chemicals and years of exposure to sunlight.

To achieve maximum enjoyment from your cushions you should of course care for them correctly. HASTE GARDEN cushions are not waterproof, so avoid exposure to extended rainfall. If cushions do become wet, separate the cushion filling from the cover and allow both to dry thoroughly. When not in use, take care to store cushions in a dry environment. Do not store cushions when wet.

Furniture offered by HASTE TRADE & DESIGN is manufactured of European wood originating from well managed forests. Using robinia for production protects our natural environment and saves its natural resources.

FSC is an international independent organization founded to promote responsible management of the world's forests, an important part of our natural resources.

Forests provide us with fresh air, food, clean water, medicine and important natural materials, such as timber and paper. They even play an important role in preventing global warming. If managed responsibly, forests can benefit forest people and the global community. However, in some countries a huge amount of timber is harvested illegally what causes enormous demage to forests and local communuties and often involves violation of human rights.

FSC certified forests must comply with FSC's rules about how the forests should be managed. Providing complementary strategies necessary to protect and maintain the world's forests, FSC organization has a positive impact on the world's forests and is part of the solution for the conservation of our natural resources.

Products with the FSC label are independently certified to guarantee to consumers that they come from responsible sources that is from forests that are managed to meet the social, economic and ecological needs of present and future generations.
