

sonterra collection™

Sizes

1" x 1"
 (Nominal 7/8" x 7/8")
 (Nominal 2.2 cm x 2.2 cm)
 1/4" thick
 Square feet per carton: 10
 Sheets per carton: 10
 Grout joint recommendation: 1/16"

Sonterra Collection comes in 12" x 12" dot mounted sheets for easier installation.

Shade Variation: (High)

Trim: No trim available

Application

	Residential	Light Commercial	Commercial
Floors	Residential bath only		
Walls	X	X	X
Backsplashes	X	X	X
Counters	X	X	X
Pools	X	X	X

Suitable for exterior walls in freezing and non-freezing climates when proper installation methods are followed.

Note: For the best results, grout color should coordinate with glass tile.

Floor Test Results

Sonterra Collection	ASTM#	Result
Water Absorption	C373	<0.07%
Scratch Hardness	MOH's	7
Chemical Resistance	C650	Resistant
Coefficient of Friction	C1028	Wet: ≥0.37 Dry: ≥0.75

Standing water and other contaminants create slippery conditions for any hard surface floor material. To avoid injuries, floor applications with exposure to these conditions require extra caution in product selection. Manufactured in accordance with ANSI 137.1 standards

Installation: For all exterior and interior applications glass mosaics must be installed with a two component mortar system consisting of a premium dry-set Portland Cement mortar mixed with 100% high solid content liquid latex or acrylic. Product must exceed ANSI 118.4 requirements.

Note: The natural beauty of glass tile lies in its subtle variation of shades. Manufactured tiles may vary from tiles shown.

Maintenance: Routine maintenance will keep your tile looking new for years to come. Under normal situations, the tile can be cleaned using clear water with a neutral tile cleaner. *Always* follow-up with a rinse of clear water. No waxes or sealers are recommended for this product.

Sonterra Collection™ glass mosaics

The Sonterra Collection is proof that beauty not only lies in the eye of the beholder, it also fits in the palm of your hand. These glass mosaic tiles come in a unique spectrum of colors. Some have an iridescent quality that makes them sparkle and shimmer like a fine gemstone, while others are melted and blended to create opalized glass. Both types create an air of refinement when used to cover walls, create patterns or accent other luxurious tiles.
