

CHARISMA

SLIDING SHOWER DOOR

The unique design of the Charisma frameless bypass sliding shower door combines an upper and lower guide rail with two frameless sliding doors for a truly amazing look. Most bypass doors are designed with significant glass and wall frames – but the Charisma's frameless "no wall profile" design allows each of the frameless doors to slide effortlessly on perfect engineered rails. Each door includes a convenient handle which may also be used as a towel bar. The top and bottom guide rails may also be shortened by cutting up to 4" to fit required installation space.

UNIQUE SLIDING MECHANISM

CHARISMA

- 2-panel frameless sliding (bypass) shower door
- "No-wall profile" design creates a unique frameless look
- Tempered thick 5/16" clear glass
- Anodized aluminum guiderails
- Chrome finish hardware
- Two towel bars allow for easy door opening in or out of the shower
- Width adjustable between 56"-60"
