The patented MDF® ProCardial™ Stethoscope stands alone among all cardiology stethoscopes. With the six included conversion attachments, this stethoscope can be easily transformed into nine different configurations, including a complete adult, pediatric, or infant cardiology stethoscope. The included clip keeps the attachments easily accessible. Constructed from premium-grade stainless steel, the ProCardial™ is the most versatile diagnostic instrument in the industry, with unmatched performance, durability, and craftsmanship. (Pat. no. 201120200178.2)

The MDF® ER Premier™ is a robust and versatile stethoscope with superior acoustic quality that enables ER physicians and first responders to deliver fast and efficient emergency care to both pediatric and adult patients using just one stethoscope. With the included screw-on cardiology bell conversion, this stethoscope can be easily transformed into a cardiology stethoscope. Constructed from premium-grade acoustically-superior stainless steel, the ER Premier™ delivers accurate auscultation of heart, lung, and Korotkoff sounds with acoustic integrity and clarity. The ER Premier™ is the ultimate diagnostic instrument with unmatched performance, durability, and aesthetics.

Constructed from premium-grade acoustically-superior stainless steel, the MDF® Classic Cardiology™ Stethoscope delivers accurate auscultation of heart, lung, and Korotkoff sounds with acoustic integrity and clarity. An ergonomic design ensures comfort for the doctor and patient, even during extended use. The Classic Cardiology™ is the ultimate diagnostic instrument with unmatched performance, durability, and aesthetics. With its extra-deep cone-shaped bell and ultrasensitive diaphragm, this cardiology stethoscope detects the entire frequency range required by cardiologists.

It might sound like a contradiction—a lightweight cardiology stethoscope. But it doesn't stop there. It has a classic Sprague Rappaport-like dual acoustic output, but with an innovative, patented X-configuration dual-lumen tube construction that eliminates the rubbing that can cause acoustic interference. The convertible cardiology bell can be quickly replaced with a pediatric diaphragm for versatility in assessing adult and pediatric patients. Precisely handcrafted, the Cardio-X™ delivers accurate auscultation of heart, lung, and Korotkoff sounds with acoustic integrity and clarity, and is quite simply the ultimate in auditory diagnostics with unmatched performance and durability.

Constructed from acoustically-superior stainless steel, the MDF® MD One™ Stethoscope delivers accurate auscultation of heart, lung, and Korotkoff sounds with acoustic integrity and clarity. An ergonomic design ensures comfort for the doctor and patient, even during extended use. The MD One™ is a premier diagnostic instrument with unmatched performance, durability, and aesthetics.

Constructed from acoustically-superior stainless steel, the MDF® MD One™ Pediatric Stethoscope delivers accurate auscultation of heart, lung, and Korotkoff sounds with acoustic integrity and clarity. An ergonomic design ensures comfort for the doctor and patient, even during extended use. The MD One™ Pediatric Stethoscope is a premier diagnostic instrument with unmatched performance, durability, and aesthetics.

Constructed from acoustically-superior stainless steel, the MDF® MD One™ Infant Stethoscope delivers accurate auscultation of heart, lung, and Korotkoff sounds with acoustic integrity and clarity. An ergonomic design ensures comfort for the doctor and patient, even during extended use. The MD One™ Infant Stethoscope is a premier diagnostic instrument with unmatched performance, durability, and aesthetics.

The MDF® Deluxe Sprague Rappaport X Stethoscope with X-configuration dual lumen acoustic tubing is the most advanced Sprague Rappaport used by healthcare professionals. Similar to the MDF® 767 Sprague Rappaport, it is five stethoscopes in one for a full range of diagnostic applications and is traditionally trusted to detect faint heart sounds and murmurs. The innovative, patented X-configuration tubing eliminates the rubbing of traditional Sprague Rappaport dual tubing that can cause acoustic interference. Healthcare professionals can assess adult, pediatric, and infant patients using this classic, versatile design.

The MDF® Sprague Rappaport Stethoscope is five stethoscopes in one for a full range of diagnostic applications and is traditionally trusted to detect faint heart sounds and murmurs. As the most versatile model on the market, this classic design allows healthcare professionals to assess adult, pediatric, and infant patients using just one stethoscope. An ergonomic design ensures comfort for the doctor and patient, even during extended use.

The MDF® Acoustica™ Stethoscope is a lightweight diagnostic instrument that delivers accurate auscultation of heart, lung, and Korotkoff sounds with acoustic integrity and clarity. An ergonomic design ensures comfort for the doctor and patient, even during extended use. Precisely handcrafted from premium aluminum, the Acoustica™ Stethoscope is the ultimate in auditory diagnostics with unmatched performance and durability.
