

MODEL F6-12

DEEP FRYER FILTERS

- The **CARBON-ACTIVATED CHARCOAL FILTERS** help to prevent odors.
- The **OIL VAPOR FILTERS** catch splatter (this is the filter you see through the hole in the lid). When the oil vapor filter looks brown (or the colored square has changed) the filter should be replaced (approx 12 uses).

F6-12 - Package includes 3 carbon-activated charcoal filters for odors, 3 oil vapor filters, and 6 paper filters.

- The **PAPER FILTERS** are for straining the oil. They are shaped to fit in the basket and when you pour the previously used oil in the pot you can filter it thru these paper filters so you start with clean oil.

SPECIFICATIONS:
SAP: 5525102200
UPC: 0-44387-06612-9
SCC 14: 1-0044387-06612-6
