

# Stick 'N' Lock Plus

The new Stick 'N' Lock Plus range combines both Twist 'N' Lock Plus Screwfix technology and an adhesive pad system, allowing the complete range of wall mounted accessories to be used anywhere in the home.

The adhesive pad adheres to most flat finished surfaces such as gloss paint, tiles and laminates. It is unsuitable for some unfinished materials such as brick, blockwork and loose, flaky surfaces.

If your surface is not suitable for the adhesive pad method then the Screwfix option allows the product to be fitted to any surface, just remove the adhesive pad and use the screw provided. This allows you to have a complete matching set of wall mounted accessories no matter what surface you wish to mount them on.

The chrome plated mild steel products can be easily removed from the adhesive pad for cleaning.

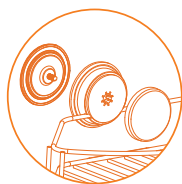

Just look for the  for products that feature this fixing system.
