

PL009 Electronic Pulse Massager

Now you can get for your home, a device normally only available in sessions with a physical therapist or chiropractor. The Prospera Electronic Pulse Massager is a Transcutaneous Electrical Nerve Stimulation unit or TENS UNITS. TENS units can help back and neck pain caused by trauma or continual strain. TENS therapy can help break this pain cycle by loosening the muscles and releasing any waste products—aiding the normal healing process. The Prospera Electronic Pulse massager is a compact, portable, micro-computer-controlled device. In addition to your back and neck, it can be used on your shoulders, legs, arms, and feet. It may help to relieve pain and numbness caused by a stiff neck, carpal-tunnel syndrome and other conditions causing chronic pain.

Product Specifications:

- Five Auto Modes (stimulation programs)
- Three selectable massages
- High frequency stimulation to relieve pain quickly
- LCD shows massage style, intensity and time remaining
- Power:DC6V (4 AAA batteries)
