32	Details and Descriptions

For some, the quintessential European villa hangs on a cliff in Positano. For others, it crowns acres of Tuscan olive groves. Some find it among the lavender of Provence, and still others, perched imperiously over the Mediterranean in Majorca.

No matter where your dream villa is located, one thing remains constant: a feeling of Old World opulence and elegance. Such is the inspiration for Grand Continental.

Designed to represent more than just one style of antique or reproduction, Grand Continental draws on a number of influences including Italian Rococo and Baroque as well as Spanish and Portuguese. With its flowing serpentine fronts, canted posts, detailed moldings and luxurious proportions, this collection exemplifies gracious living on a grand scale.

Veneers of white ash burl and rustic maple combine with rustic maple solids to form the canvas for a hand finish that simulates centuries of loving use. Heavy distressing with rock, rasp, wormhole, axe and sand breaking give each piece its own unique character. Thoughtfully-placed gold tipping combined with rich toffee brown, black wood rub-through and textured antique white finishes lend the collection its stately patina.

Detailed with rustic flamed brass knobs and pulls, Grand Continental speaks to traditional style with a distinctly European flair. A complete range of pieces for bedroom, dining and living—including a number of unique accents—Grand Continental allows you to live the villa lifestyle wherever you call home.

FLORENTINE GOLD

So much of what gives Grand Continental its Old World opulence lies in the finish. Veneers of white ash burl and rustic maple combine with rustic maple solids to form the canvas for a distinctly rich finish. Heavy physical distressing in the form of rock, rasp, wormhole, axe and sand breaking are the first steps in this complicated process. We then layer on step after step of artistic elements—including warm water spatter, fly specking, cowtail and glaze—to produce a finish that is complex and bright, with clarity and depth. The final step is a labor intensive “wool wax” that is applied and buffed out by hand to give each piece a welcome touch and glow. Additional handwork can be found on select pieces in the form of gold striping, ochre tipping and a thick, gesso-textured brush stroke.

hardware

Knob pulls are die cast in zinc with a flamed brass finish and come in two sizes of bail and rosettes with fine egg and dart detail. “Door knocker” pulls feature fine egg and dart and bead detail. Mushroom pulls showcase egg and dart, concentric ring and bead detail.

fabric

A chenille with a woven slub of silk-like threads, this luxurious fabric will wear like iron, but retain an Old World elegance.
Content: 85% rayon, 15% polyester

SUMMIT MALT

leather

Grand Continental features only the finest top-grain leather that’s been aniline-dyed to give it a more supple texture, greater depth and a rich patina that only gets better with time.

ECHO KINGSROAD LEATHER

Because leather is a natural product, both texture and color will vary slightly from hide to hide and even within the same hide. These natural markings and color variations enhance leather’s individual character and bring out the rich, unique qualities so highly prized.

SUBTLE VARIATIONS
IN COLOR

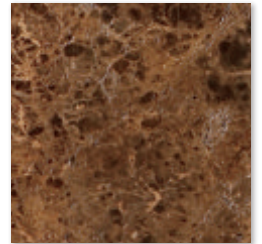

nail head trim

Each nail in our antique brass nail head trim detail is placed by hand to ensure a beautifully finished piece.

marble

Each piece of natural marble used in Grand Continental is unique. The characteristic swirls, vein lines and pattern variations are due to mineral impurities originally present in the limestone and also give marble its color. Consequently your marble will not be identical in color to the piece shown here. In addition, structural variations of the stone’s crystallization cause what appear to be hairline cracks. Like the color variations, the structural variations are not a defect but an important part of any marble’s unique character.

-100 INFRARED REMOTE READER

The infrared remote reader transfers your remote control signals to your audio/video components even if they are positioned behind wood panel doors, eliminating the need to insert glass panels. The infrared reader includes a receiver with mounting block, an infrared repeater control unit with power cord and three emitters. Each emitter, when properly positioned on the interior of the case, will transfer your remote control signal to the audio/video components positioned on one shelf. The system is easy to install and use. No programming is needed and the emitters may be repositioned as your audio/video components or configurations change.

- 47 TEATRO LEFT THEATER CABINET

- 147 Upper Section
- 247 Lower Section

Back panel has woodtone finish.
