Variations in color, shade, and texture are inherent in ceramic tile. Several pieces should be examined collectively prior to installation.

Grout Joint Recommendation: Approximately 1/16"

**APPLICATION**

Cristallo crackle finish may be used on walls and on shower floors if properly sealed. It is not recommended for general use on floors and counters.

**NOTES**

There is a potential for size variation with this product.

It is recommended to apply a grout release or pre-sealer to the Cristallo Crackle finish due to the cracks in the glaze. After grouting, a penetrating sealer should be used to seal the surface of the tile. Abrasive cleaners should not be used with this product. White grout is recommended.
