## COLOR SHADE VARIATION

Variations in color, shade, and texture are inherent in ceramic tile. Several pieces should be examined collectively prior to installation.

Grout Joint Recommendation: Approximately 3/16"

## APPLICATION

Appropriate for interior and exterior floors and walls in freezing and non-freezing temperatures. Porcelain tile floors, like other types of glazed floors, can become slippery when wet. Take extra care when selecting a floor product that will be exposed to conditions such as liquids, grease, or oil. Always follow proper installation methods.
