ANTI-TIPPING INSTALLATION

- After assembly of your cabinet, you should be left with a short screw, a washer and a nylon strap.
- Screw through the washer then the strap (near end) and into the back of a wood panel at rear of the cabinet.
- You will need to choose a proper screw and/or fitting to attach the strap to your wall. If you are uncertain what to use, contact a hardware store specialist.

INSTALLATION D'ANTI-TIPPING

- Après ensemble de votre coffret, vous devriez être laissés avec une vis courte, une rondelle et une courroie en nylon.
- Visser par la rondelle puis la courroie (près de l'extrémité) et dans le dos d'un panneau en bois à l'arrière du coffret.
- Vous devrez choisir une vis et/ou un ajustage de précision appropriés pour attacher la courroie à votre mur. Si vous êtes incertain ce qui à employer, contactez un spécialiste en magasin de matériel.

INSTALACIÓN ANTI-INCLINACIÓN

- Una vez ensamblado el gabinete, debe sobrar un tornillo corto, una arandela y una correa de nailon.
- Atornille a través de la arandela, de la correa (cerca del extremo) y atrás de un panel de madera en la parte posterior del gabinete.
- Usted tendrá que elegir un tornillo apropiado y/o conexión para sujetar la correa a la pared. Si no está seguro de qué usar, comuníquese con un especialista de una ferretería.
