Fold-Down Handle		●	●	●	●
Decaf Lid			●	●	

\*Rating is based on water at a starting temperature of 203°F (95°C) at a room temperature of 68°F (20°C)

#### What is the difference between the various models of Zojirushi air pot® beverage dispensers?

The basic difference is the liner and pump mechanism.

	Push Button	Lever Pump
Glass Liner	AAPE-22/25 AAWE-30	AASB-22
Stainless Steel Liner		SR-AG30

#### What is the difference between push button and lever pump air pot® beverage dispensers?

The level pump air pot® dispensers are recommended for those who serve a lot of coffee (or other beverages) during the day. The lever makes it easier to pump and puts less pressure on the wrist while pumping.

#### What is vacuum insulation?

The air between two layers of glass or stainless steel is removed to create a vacuum. Because there is no air, the temperature on the other side of the wall does not transfer over, keeping beverages hot or cold for hours.

#### What is the difference between a glass liner and a stainless steel liner?

The main difference is durability and ease of cleaning. If you have breakage problems, the stainless steel liner is recommended. Stainless steel is virtually indestructible except to bleach and chlorine. Glass liners have a higher incidence of breakage, but are easier to clean away coffee and tea stains.

#### Glass Liner vs. Stainless Steel Liner Comparison

	Pros	Cons
Glass Liner	<ul style="list-style-type: none"> <li>• Excellent heat retention</li> <li>• Easy-to-clean</li> <li>• Does not alter the flavor of coffee</li> </ul>	<ul style="list-style-type: none"> <li>• Glass liner can break, although replaceable</li> </ul>
Stainless Steel Liner	<ul style="list-style-type: none"> <li>• Indestructible</li> <li>• Excellent heat retention (preheating recommended)</li> </ul>	<ul style="list-style-type: none"> <li>• May stain</li> <li>• Cannot come in contact with bleach or chlorine</li> </ul>

#### The Story About Zojirushi:

Zojirushi (pronounced 'zoh-jee-ROO-shee') began in Japan in 1918 as a manufacturer of hand-blown vacuum bottles. Today, Zojirushi's product line extends to high-end small appliances such as rice cookers, breadmakers and coffee makers, high quality vacuum insulated products like vacuum bottles, lunch jars and carafes, and commercial restaurant & coffee equipment. Recently, Zojirushi has enhanced the focus on design and how appliances fit into everyday lives with the introduction of their ZUTTO® Collection and RIZO®. The name Zojirushi means "Elephant brand" in Japanese.
