### Why should I get a Zojirushi vacuum bottle?

Vacuum bottles help you become eco-friendly by reducing the use of disposable cups and bottles. Not only that, it will keep your beverage hot or cold for hours, without a refrigerator or microwave. So throw a Zojirushi vacuum bottle in your gym bag or purse and stay hydrated.

### How does it keep beverages hot?

The air between two thin layers of stainless steel that make up the body of the bottle is removed to create a vacuum. Because there is no air, the temperature on the other side of the wall does not transfer over, keeping beverages hot or cold for hours.

### The Story About Zojirushi:

Zojirushi (pronounced 'zoh-jee-ROO-shee') began in Japan in 1918 as a manufacturer of hand-blown vacuum bottles. Today, Zojirushi's product line extends to high-end small appliances such as rice cookers, breadmakers and coffee makers, high quality vacuum insulated products like vacuum bottles, lunch jars and carafes, and commercial restaurant and coffee equipment. The name Zojirushi means "Elephant brand" in Japanese.
