

Instruction Sheet for Mode¹ 823 Wheel kit

1. Extract front legs from walker and remove gray cap with hole from front legs of walker frame.
2. Attach solid aluminum button to spring. (see photo)

3. Insert spring with button attached into frame of front walker leg with the curved side up and the open side down.
4. Push up into leg until button goes in lowest hole.
5. Hold down button and slide wheel kit over frame of leg until desired position is attained.
(Getting Wheel kit started over frame will be difficult by design, but it will slide over frame)
