

Outdoor Living Products that Satisfy, Simplify and Beautify

Griffith Creek Designs is Privileged to Present Heart & Eagle Company Handcrafted Birding Products

The Queen Anne Feeder

The Heart & Eagle Queen Anne Feeder is handcrafted of century old barn timbers. Rather than allow a once prominent feature of the American landscape fade into a distant memory, John Guertin has transformed the red barn of days gone by into a work of art and a nature refuge. The Heart & Eagle Company feeders and houses embody the American past and the spirit of rebirth. You will find no other piece available today to match the quality of craftsmanship and design found in every Heart & Eagle Company piece. That is why Griffith Creek Designs is so proud to present this line of feeders and houses.
