

The Com-Pak Bath

The premier choice for today's bathrooms

SAFETY

- Thermal Safeguard
 - High temperature manual reset: turns off heater if normal operating temperatures are exceeded

QUALITY

- Durable steel tube and plate constructed heating element - painted to resist rusting
- Powder coat paint process eliminates sharp metal edges

COMFORT

- Ideal for instant warmth in bathrooms
- Advanced built-in controls
 - Thermostat: range 45°F-85°F: with disabled (no heat) position
 - 60 minute timer overrides thermostat for instant warmth

CONVENIENCE

- Multi-Volt and Multi-Watt options
- Unique low profile grill only 1/2" deep

General Information:

The Com-Pak Bath Heater is our most versatile and stylish heater. Equipped with a built-in thermostat and 60-minute timer, it is a great option for adding supplemental heat to any room. The 60-minute auto-timer overrides the thermostat setting for instant warmth and comfort.* The Com-Pak Bath Heater is Cadet's first heater with both multi-volt and multi-watt options available. Because the Com-Pak Bath Heater fits into any C-series wall can, it is a great option for replacement, remodel or new construction.

**Once timer expires; control of the heater will return to the thermostat and the previous set-point setting.*

Architectural Information:

Fan forced electric air heaters shall be UL listed, factory rated 120V/240V or dual field rated 208V/240V. The painted wall mounting can is made from 20-gauge sheet metal with six electrical knockouts and a 22 cubic inch wiring compartment. Each heating unit shall be of unitized construction and attach to the wall can with a single screw and shall be self contained and completely separate from the wall mounting can. Elements shall be tube and plate, painted, with an over-sized 16 amp rating at 240V high temperature manual reset limit switch. A centrifugal blower shall be driven by an impedance protected motor. The motor shall be totally isolated from the heating element. Metal grill shall be of one piece, 20-gauge construction, and finished with a powder coat paint system.

Technical Information:

All heaters include a built-in single pole thermostat and 60-minute timer. The Com-Pak Bath Heater is not to be used with a wall thermostat. The multi-volt option must be configured for the correct voltage before installing the heater. The multi-watt option must be configured for the desired wattage before installing the heater. UL requires heater to be placed a minimum distance of 6" from adjacent surfaces and 4.5" from the floor. Manufacturer recommends installation 12" from all surfaces. A 3' minimum clearance is required for furniture or other objects placed directly in front of heater.

NOTE: Manufacturer recommends installing heater assembly after walls are finished. Heater must be cleaned every six months minimum.

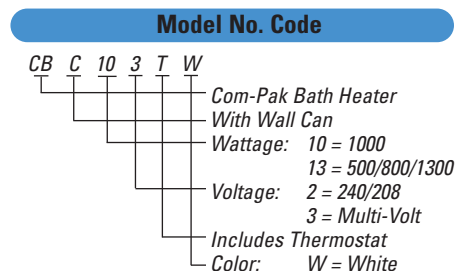

Ordering Information:

Recommended for elevations under 10,000 feet. Available in white only.
