

Item:	Sit Rite™
SKU:	40140
<u>Description</u> Today's contoured vehicle seats often tilt infant carriers back towards the rear of the seat, positioning infants at an incorrect angle. Sit Rite helps to level rear-facing child safety seats and position infants at the proper angle. Forget rolled-up towels. Sit Rite will not flatten during tightening and installation, and the dense foam construction adds firm, lateral support to the vehicle seat to help discourage sideways tipping. Sit Rite fits all rear-facing safety seats and infant carrier bases and is LATCH compatible. Crash-tested.	
Product Launch Date	Sep-11
Composition: 100% PE foam	

Features and Benefits

- | | |
|----------------------------------|----------------------------------------------------|
| • High density polyethylene foam | Less compression for better support |
| • Size and shape | Based on recommendations from the safety community |
| • Cut to any length | Fits any width vehicle seat |
| • Dimensions | 3" H x 15.5" W x 3" D (7.62 x 39.37 x 7.62 cm) |
| • Weight | 0.2 lbs (0.09 kg) |
