

# ASSEMBLY INSTRUCTION

NOTE: FRAME IS ASSEMBLED UP SIDE DOWN

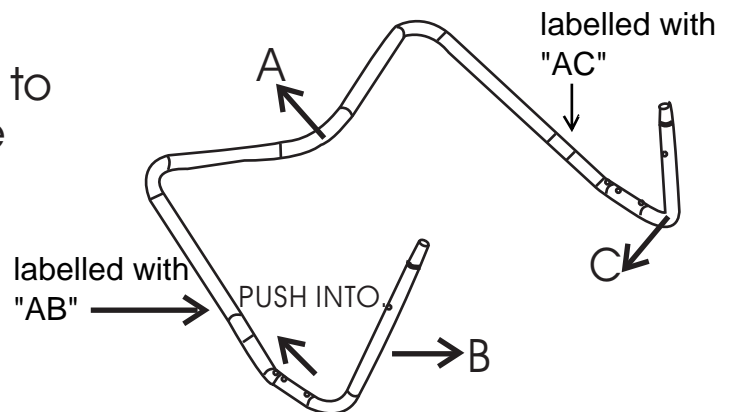

## STEP 1

Unfold the oval frame and sling. Connect the 2 halves as shown in step 1.

## STEP 2

Assemble the base of the frame A to both legs B and C as shown where the end marked AB attaches to leg B and the end marked AC attaches to leg C.

NOTE: The cushion has been compressed to approximately 1/5 size for the shipping. From the time it was packed until you received it has been at least 45 days. Due to this IT WILL TAKE ABOUT 24 HOURS TO REGAIN FULL LOFT. Please grab the filler material from both sides around the outside edge of the cover and pull outward to help speed this up. Once the cushion has been decompressed it will stay that way. Enjoy!

## STEP 3

Carefully Line up the holes in the sling fabric with the holes in the oval frame as shown in step 3, some repositioning of fabric on frame may be needed.

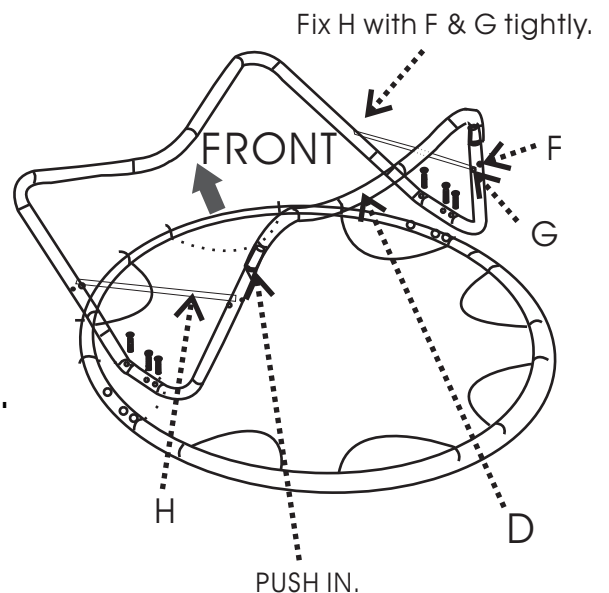

## STEP 4

Use the E screws to attach partially assembled base frame to oval frame, inserting them through the holes as shown in Step 4. Do not tighten these screws at this point.

## STEP 5

Add frame section D to the base as shown in step 5. Also add the 2 stretchers part H, to the frame using bolt F and nut G as shown in step 5. 2 stretchers H to the outside of the frame. Now tighten all the screws and bolts.

NOTE: The cushion has been compressed to approximately 1/5 size for the shipping. From the time it was packed until you received it has been at least 45 days. Due to this IT WILL TAKE ABOUT 24 HOURS TO REGAIN FULL LOFT  
Please grab the filler material from both sides around the outside edge of the cover and pull outward to help speed this up.
