More Positions = More Comfort

Seat angles are shown by white dotted line.

Activate MaxiComfort™ and fine tune your position for absolute comfort!

olden Technologies proudly introduces MaxiComfort™, a new concept in seating comfort. MaxiComfort™ allows for a greater range of positioning at the touch of a button to help improve circulation, control pressure and enhance comfort. Experience the difference of this new motion technology available in multiple sizes and styles.

No chair offers you more positions and options.

ZERO GRAVITY
POSITIONING TECHNOLOGY

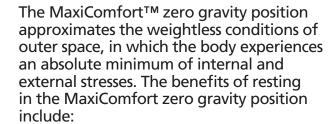

ZERO GRAVITY POSITIONING TECHNOLOGY

Experience the Zero Gravity Difference...

Correct Spinal Alignment. The proper neutral position for the S-curve of your spine is maintained along the three regions of your back: cervical (neck), thoracic (upper back) and lumbar (lower back).

The lumbar region (lower back), especially, is relieved of almost all pressure. Disc compression is greatly reduced or eliminated completely.

Expanded Lung Capacity. Via the open angle created between the torso and thighs, breathing is improved, thereby increasing the oxygen levels in the blood.

Improved Circulation. With the legs elevated above the heart, stress on the heart is minimized, and the oxygen-rich blood being pumped to fatigued muscles helps them to recover faster.

The Neutral Position.

The neutral posture position maintains the four natural curves of your spine to minimize strain on supporting muscles and ligaments. This is the optimal posture to prevent back and muscle pain.

Only Golden Technologies lift and recline chairs feature MaxiComfort™, our patent-pending zero gravity technology that allows you to relax in the zero gravity position developed by NASA.

In the zero gravity position, your legs are elevated above your heart, creating an open angle between your torso and thighs. This position puts your back in the correct resting posture, where the S-curve of your spine is properly maintained and virtually all pressure on the lower back is relieved. This position has beneficial effects on many other areas of the body: lung capacity is expanded to ease breathing and boost oxygen levels; and circulation improves to minimize stress on the heart, leaving you with less muscle fatigue.

What You Want to Do Advantages

Recline/lower chair back **Back Down** button Feel rested by lowering the back angle

Raise the back **Back Up** button

Feel more comfortable while eating or watching TV

Raise foot board Activate MaxiComfort™ Raise seat **Foot Board & Seat** button Extend your legs, then raise the seat

Lower foot board & Lift the chair Foot Board & Lift button Lower your legs, then lift the chair

Lower the chair, Extend foot board, Raise the seat **Sit & Recline** button Control multiple features with only 1 button

Raise the back, Lower seat, Lower the foot board, & Raise the chair Close & Lift button Control multiple features with only 1 button
