

New Crib Mattress Support Information

We are excited to announce the newest improvement to our cribs. In keeping with our all wood philosophy, we've upgraded our mattress support system. The new solid wood platform will make converting your crib to a toddler bed even easier. When converting to a toddler bed, the "Y" brackets can be removed and the support will lower onto the crib rails. We have an optional crib guardrail that can be added when you feel your toddler is ready.

The setup instructions are identical, but we have included a few images so you can see how the brackets attach to the stabilizer rails. If you have any questions or concerns, please feel free to email us or call us at (951) 549-0590

Thank you for choosing Newport Cottages® for your nursery!
