

PLEAT BOX

Xavier Mañosa & Mashallah, 2011

The idea behind the Pleat Box is that of a sophisticated combination between a digitally-designed crease in a piece of cloth, the silhouette of which is applied to a ceramic base.

The outer part of the lamp is offered in white ceramic, underglazed terracotta and grey –the result of recycling different enamels. The brilliant white enamel interior creates a glitter effect, which enhances the light from the lamp. It can also be supplied in gold on the inside, which generates an extremely warm light.

Available in 4 sizes –diameter 47cm, 36cm, 24cm & 13cm-.

Pleat Box has come about through the first-ever collaboration between Xavier Mañosa, a master ceramicist from Barcelona, and the Mashallah design studio in Berlin with Marset.

Ceramic diffuser. Available in white, red clay and grey with the inner part in white or gold.
