

PANTON CLASSIC

Verner Pantan, 1959/60

vitra.

Panton Chair Classic

The size was established pursuant to EN-1335-1

Verner Pantan spent many years thinking about how to produce a plastic chair molded in one piece. Together with Vitra, he came up with the first prototypes in the 1960s and the Pantan Chair went into series production as of 1967. The Pantan Chair Classic is produced using the same procedure as the first series.

- **Shell:** solid plastic shell made of hard foam.
- **Surface:** glossy lacquer in black, red and white.
