

# PANTON CHAIR

Verner Pantan, 1999

vitra.

## Pantan Chair

Because of progress in plastics technology, the legendary Pantan Chair has been through a number of production phases since its original launch in 1967. The last version of the iconic chair authorized by Verner Pantan was produced in collaboration with the designer at the end of the 1990s. This model realized

one of Pantan's fundamental objectives for the first time: a plastic chair as an inexpensive industrial product.

- **Back, seat and foot:** made of dyed through polypropylene. Matt finish.

- **Note:** special additives slow down the fading process caused by ultraviolet rays. However, leaving the chair exposed to the sun for an extended period of time can result in color changes. We recommend not leaving the chair in the sun.

### \*Pantan Chair

	Article no.	List \$	MAP \$
Polypropylene	440 030 00	370.00	310.00

\* Quickship
