

Side copy - for 15,000 gallon, and 30,000 gallon Kits.

ROBELLE POOL WINTERIZING KIT

INSTRUCTIONS

Add the contents of your Pool Winterizing Kit by following the instructions below. Before adding any chemicals to your pool, be sure that your pool filter is operating. Consult individual product labels for cautions and warnings prior to use.

WINTER SHOCK

Winter Shock is a 100% soluble, non-chlorine pool water winter shock treatment. Since Winter Shock contains no chlorine, it should not be used for daily chlorination and/or disinfection. Use Robelle EPA registered chlorinating sanitizers to maintain in-season chlorine residual.

DIRECTIONS FOR USE: Add Winter Shock at the rate of 2 lbs. per 15,000 gallons of pool water. Winter Shock should be added to the pool when it is not in use. Add by pouring directly into pool skimmer while filter is running.

WAIT ONE HOUR BEFORE ADDING ANTI-STAIN CONTROL

ANTI-STAIN CONTROL

A stain and scale inhibitor that 'ties up' metals and inactivates scale-forming carbonates in the pool water – helping to ensure a stain- and scale-free pool when opened in the spring. Add Anti-Stain control by pouring directly into pool around entire perimeter at a rate of one quart per 15,000 gallons of pool water.

ALLOW WATER TO CIRCULATE THREE HOURS BEFORE COVERING

For more detailed advice or instructions, consult with your local pool professional.
