Collection Chair
Information Guide

Pneumatic Seat Height Adjustment

- Allows quick and easy adjustment
- Regulates height of the chair relative to the floor

Multi-Function

- Three levers to modify angle of back relative to the seat, control tilt and forward tilt for keyboard intensive activities. Tilt is free float or locking within a fixed range. This control also has ratchet back height adjustment.

Tilt Tension

- Controls rate and ease with which the chair reclines for different weights and strengths of users.

#1. Back Angle Tilt - to adjust back angle lift lever up, when lever is up back tilts freely, push lever down to lock in any position.

#2. Seat Angle Tilt - to adjust seat angle lift lever up, when lever is up seat tilts freely, push lever down to lock in any position.

#3. Seat Height - apply pressure to seat and lift lever to decrease seat height and remove pressure and lift lever to increase seat height

#4. Tilt Tension - turn clock-wise to intense tension and reduce tilt, turn counter clock-wise to decrease tension and allow more tilt

#5. Forward Tilt - when seat angle tilt is in the down position, push #5 lever forward.
