

Niagara Counter Tables

RECTANGULAR TOP

SQUARE TOP

WOOD → Walnut or Natural Oak Ply

BASE → Stainless Steel

The Niagara Counter Table is a versatile design with a modern, industrial feel. Part of the LOFT Series – designed and scaled for city living. With a much smaller footprint than traditional dining tables, the Niagara works well in condos, apartments, and spaces where every square foot counts. At 36" high, this table is perfectly suited for use as a workstation when it isn't being used for dining. It features simple, stainless steel legs with industrial, lock casters, and an exposed plywood top in walnut or oak finish.
