

STUD TAVOLO

DESIGN DIESEL /2009

Pure outrageous energy, pure striking force for an object that expresses a rock 'n roll lifestyle 100%. Its imposing metal base brings to mind the studs on Diesel belts. Its diffuser immediately recalls mirrored glasses, while its column shape recalls that of a microphone or a lipstick; every detail has been designed to create a metal-maniac feel. Stud is not merely a lamp, but a luminous totem in a hard rock environment! Stud's light spreads all around the space, delimitating a clear area. It can also be oriented as you please by rotating the half-chrome, half-transparent diffuser, with an effect that recalls that of chrome-plated incandescent bulbs.
