

GRAF TERRA

DESIGN DIESEL /2009

Graf speaks the language of images. The lampshade features the graphic style elements representing the concepts that have inspired the entire home collection, with a unique and immediately recognisable style. Music interpreted by a DJ at his console, nature experienced in personal style. The style elements are represented by images especially created for Graf, with a highly original graphic treatment and a scale of representation that is different according to the version; whether it is the floor, hanging, or table version. The fabric covering the diffuser has a special shiny finish that creates a fun 'wet paint' effect. Like work of contemporary pop art, Graf can be placed in any space to characterise it with its strong personality and visual message, which is at the same time universal and suitable for different style environments.
