

A New Generation of Compact Battery Scrubbers

RA 505 IBCT

Safety levers

Ensures machine will not run without operator

See through tank cover

Operator can always see inside the tank

Rounded form factor

Enables unobstructed view of the brush

Borderless cleaning

Non-marking wheels hug the walls and brush proceeds frame for cleaning underneath overhangs

Suction Unit

Brush unit and suction bar lifting are both foot operated

RA 505 IBCT • Speed/Supply Regulated Dosing Option • Mid-Size Battery Scrubber

A splendidly clean and evenly dry floor! That's what the new **RA 505 IBCT** scrubber dryer leaves behind. It is easy to use, ecological and efficient.

Equipped with a 20" scrubbing brush, forward and backward traction drive, and uses an integrated battery charger, the new **RA 505 IBCT** is the perfect way to restore daily order to your floors — even works on pavement.

With the factory installed Cleanfix Advanced Dosing System (CADS), activated, this high efficiency scrubber can save you up to 50% on chemical usage and costs, and that is good for your business and the environment.

20" cleaning brush is interchangeable and can be mounted to side when not in use.

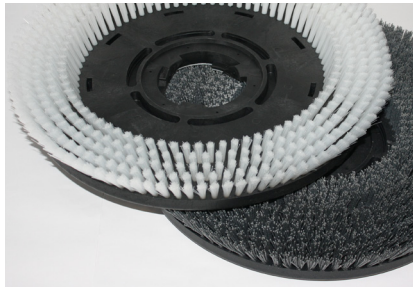

Foot operated suction bar

SWISS MADE
QUALITY

Easy to use, adjustable control panel

Aggregated pavement brush* and scrubber

Large recovery tank with see through door

Non-marking wheels allow you to hug the walls

Filing hose*, get clean water from any tap

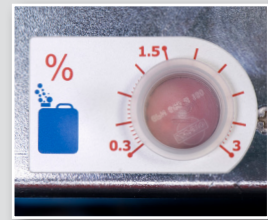

*optional

Economical and ecological

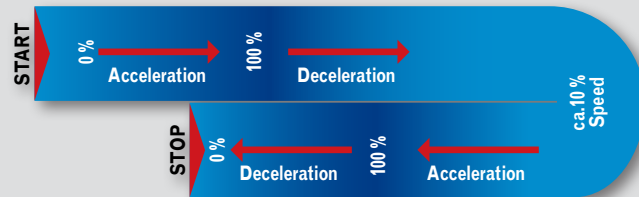

Available Cleanfix Advanced Dosing System (CADS)

Make Chemical Application Easy

With the optional available CADS, the chemical product you need for your work is carefully dosed to the fresh water just before the cleaning solution outlet. Just set the concentration of the chemical product, connect the canister (1.4 Gal) and start working. Dosing will change as needed with speed.

Speed dependent cleaning supply

The cleaning solution supply automatically adapts to follow the acceleration or deceleration so a perfect amount is dispensed every time.

The CADS regulates the supply of cleaning solution, resulting in dry curves without puddles at the apex. Benefits of the optional CADS system include:

- High efficiency and reduced labor costs
- Up to 30 % less consumption of water and chemical product, this means less time wasted refilling
- The 14.5 Gal fresh water tank is therefore comparable with a conventional 19.8 Gal scrubber dryer
- Even dry floor. No additional drying process needed in curves

RA 505 IBCT - CADS DOSING SYSTEM & AGM BATTERY

Order Number	273643
Squeegee Width	34.6"
Scrubbing Path	20"
Waterlift	52"
Fresh Water Capacity	14.5 gal
Dirty Water Capacity	15.7 gal
Brush pressure	105.8 lbs
Weight (incl. Battery)	370.3 lbs
Measurements l/w/h	54.3"/22"/44.4"
Max. climbing rate	8°

RA 505 IBCT - INCLUDED AGM BATTERY

Order Number	274690
Squeegee Width	34.6"
Scrubbing Path	20"
Waterlift	52"
Fresh Water Capacity	14.5 gal
Dirty Water Capacity	15.7 gal
Brush pressure	105.8 lbs
Weight (incl. Battery)	370.3 lbs
Measurements l/w/h	54.3"/22"/44.4"
Max. climbing rate	8°

Shipped complete with:

20" Scrubbing brush	PN-270601
Curved Suction Nozzle	PN-270598

Shipped complete with:

20" Scrubbing brush	PN-270601
Curved Suction Nozzle	PN-270598
