Cachet

Uncommon comfort. Uncommon versatility.

Just try Cachet™ and you'll see: there's a lot more to its sleek design than meets the eye. Innovative materials and 11 patents, for instance. Together, they distribute support in response to each sitter's movement. The result is non-stop comfort, without the need for adjustments. And, the flexibility of Cachet makes it a comfortable choice for side, meeting, team and short-term work applications.

“Our customers are amazed at such comfort. Our maintenance staff appreciates the ease of stacking, moving and storing.”

Marcie Lewis, President, Ryerson Library Foundation, Grand Rapids, MI

Environmentally responsible.

- Exceptionally durable and easy-to-clean for a longer life
- Glass-filled nylon frame and polypropylene construction is easy to disassemble for recycling
- 99% recyclable by weight
- Like all Steelcase brand seating (U.S.), Cachet is GREENGUARD Indoor Air Quality Certified®

Ergonomic Features

1 The Cachet chair, with its unique “balanced action rocker” mechanism, automatically adjusts to the way you sit and supports healthy sitting. Cachet’s composite edges and flexible slotted surfaces absorb and evenly distribute the weight of your body every time you sit.

Stackable

2 Lightweight stackers are available with or without arms and weigh 11 pounds (about half the weight of a typical stacker). Chairs can be stacked five high on the floor or 20 high on a dolly.

Optional, Removable Cushions

3 Change the look of Cachet chairs with seat and back cushions in a wide choice of Steelcase and Designtex fabrics or your own materials. They snap on and off easily — no need for tools.

“The Cachet chair not only gives great support and comfort, but also has the ability to withstand high-volume use while exhibiting great durability and requiring little or no maintenance.”

Louis G. Sheehy, Assistant Director, Trumbull Library System, Trumbull, CT

“This work chair and I are joined at the hip (or there about!). It is so mobile, breathable and light.”

Pat Whempner, Corporate Studio, Callison Architecture, Seattle, WA

Pearce's Principle

Designer Peter Jon Pearce created this innovative line of seating based upon his development of a balanced-action-suspension system. This unique design results in remarkable ergonomic performance. Any user, regardless of posture, height, or weight, can instantly be comfortable sitting and reclining in Cachet without making any manual tension adjustments. The mechanism is so well balanced that the Cachet chair naturally follows the sitter as posture changes.

Work Chair

Cachet work chairs are ideal for meeting, team and short-term work spaces. Height adjusts pneumatically within a five-inch range. Arms flip up when they're not needed.

Multi-Use Chair

Lightweight stackers are available with or without arms and weigh 11 pounds (about half the weight of a typical stacker). Chairs can be stacked five high on the floor or 20 high on a dolly.

Stool

Perfect for healthcare and research applications where comfort and cleanability are key. The Cachet stool adjusts pneumatically to a comfortable height for each user.

Greenguard Certification™

Like all Steelcase brand seating (U.S.), Cachet is GREENGUARD Indoor Air Quality Certified.®

Dimensions

Work Chair
