THE ANSWER TO CLEAN, CLEAR WATER

Metal & Stain Control is a concentrated product that suspends and neutralizes mineral elements that can stain and corrode your spa. Metal & Stain Control also acts as a clarifier to cluster unfilterable microscopic minerals together so that they can be removed in the filtration process.

DIRECTIONS

1. Upon initially filling your spa, add 16 ounces of Metal & Stain Control. Allow water to circulate for at least one hour after adding the product.
2. If fresh water is frequently added to the spa due to evaporation or bather activity, it is recommended that you supplement the initial dose. Add 3 ounces once a month.

Note: For gradual removal of an existing stain, double the above dose and allow jets to operate for one hour.

CAUTION

Avoid contact with skin, eyes or clothing. In case of eye contact, flush immediately with water for at least 15 minutes. Seek medical attention.
