

## **DOMESTIC WOODS**

### **DARK WALNUT**

Our custom stain enhances the warmth and depth of our flat-cut American walnut without concealing its grain. Finished in low luster lacquer.

### **NATURAL WALNUT**

Furniture starts with great lumber. Our craftsmen hand-pick each piece to ensure consistency in coloration and grain pattern. The character of our walnut is enhanced by a tung oil finish.

### **ESPRESSO WALNUT**

American Walnut receives a four step process of a hand-rubbed custom stain. Espresso is predominately black with hues of brown and red.

### **BLACK ASH**

The most prominent grain pattern available. An extremely hard wood, the blackening is a series of aniline dyes under a low sheen finish.

### **WHITE ASH**

A warm finish on a striking grain. Our white ash begins with careful selection for the whitest and clearest wood possible. Hand-rubbed stain makes the finish complete.

### **CHARCOAL ASH**

An labor-intensive process that begins with the highest grade wood selection and ends with a seven step hand-rubbed finish. The result is a mood setting, low luster finish.

## **PREMIUM METAL:**

### **STAINLESS**

Unparalleled by any stainless available, our finish undergoes four hand finishing processes. The result is a brushed-satin finish second to none. Its durability matches its beauty without lacquer.

## **METAL:**

### **RUST**

Commonly known as "Corten" steel, this is a truly a unique finish. Raw steel undergoes an intensive two week process of oxidation. The steel is then neutralized to prevent further rusting from occurring. Variances in color make each piece unique.
