

# AUTO FLOOR GUARD

"We catch it all"

**AutoFloorGuard** containment mat is the best and easiest way to keep your garage floor clean. AutoFloorGuard stops just about anything liquid spilled, leaked or dropped from your car from damaging your garage floor! And when you are ready to clean simply pull the mat over the garage threshold and either sweep or hose down the mat.

**AutoFloorGuard** gets delivered and in five minutes it's ready to use! Now park your car, motorcycle, lawn equipment or even change the oil and not worry about any dirt, grime, fluids, mud or snow getting onto your floor then getting into your house.

**AutoFloorGuard** has so many uses. It does not matter whether you are a classic car guy and want to work on your new hot rod and not worry about fluids leaking or you live in the North and do not want the snow, ice and mud to be all over your floor and then it comes into your house!

- 
- **Commercial Grade Woven PVC Fabric:** AutoFloorGuard's fabric is used and trusted in the trucking industry and handle day in and day out American's toughest conditions. Our Fabric is Mildew and Rot resistance as well as Ultraviolet treated to resist fading and prevent fabric breakdown. Fabric has been tested to -40 degrees. AutoFloorGuard is heavier than a competitors product which allows fabric to lay out and relax making it look and perform better.
  - **AutoFloorGuard Standard Size is 8'6" x 18' with squared edges:** Wider than most competing floor guards allowing room for many SUV's to drop dirt, snow and mud and not mess up your floor. AutoFloorGuard covers an area of 153 sq ft.
  - **Heat-Sealed Watertight Seams:** AutoFloorGuard seams are reinforced and thermal welded to provide durability and longevity.
  - **Build-in Containment Edge:** AutoFloorGuard uses a resilient foam material that will work in all temperature environments versus some competitors that use plastic edge pieces when exposed to extreme cold temperatures could become brittle and break.
  - **Rectangle design:** AutoFloorGuard was designed to allow more room in the corners for water, mud, snow or any other liquid drip and be captured. It also makes it easier to clean when pulling the mat over the garage threshold to clean.
  - **Ready to Use:** AutoFloorGuard was designed with simplicity in mind. Your AutoFloorGuard containment mat comes pre-assembled and ready to use. Just open box, remove, roll out and use! That is it. If you want plastic parts all over your garage trying to figure out how to clip them onto the polyvinyl without creasing the material or allowing gaps so liquid leaks out then you need to buy the competition and not AutoFloorGuard.
