

Monet Cabinet Mounted

## Monet

[NL]

De impressionistische schilder Claude Monet, schilderde zijn belangrijkste werken tussen 1860 en 1890. Monet was de grondlegger van een tot dan ongeapprecieerde stijl. Door de fijnheid van onze MONET collectie schilderijverlichting, geeft deze vooral aandacht aan het werk in plaats van aan het armatuur zelf. Door de toestellen te koppelen kan men de lengte bekomen die het beste aansluit bij de breedte van de schilderijen. Ook kan men zo afhankelijk van de kleuren van het schilderij opteren voor meer lampjes of minder lampjes, en zo de lichtsterkte bepalen. U kan kiezen tussen verschillende muurbasissen, kleuren en armsystemen...

[FR]

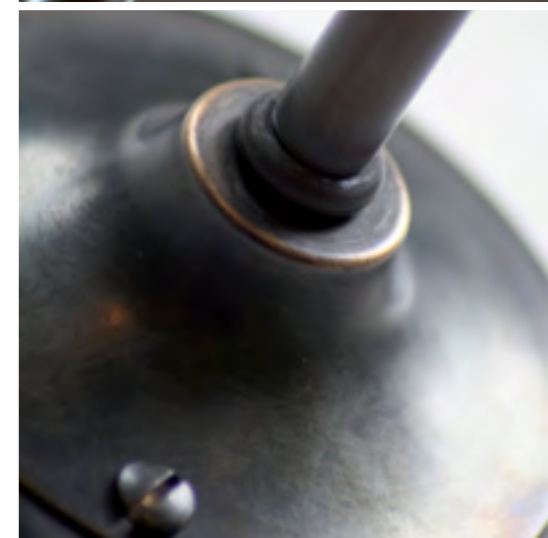

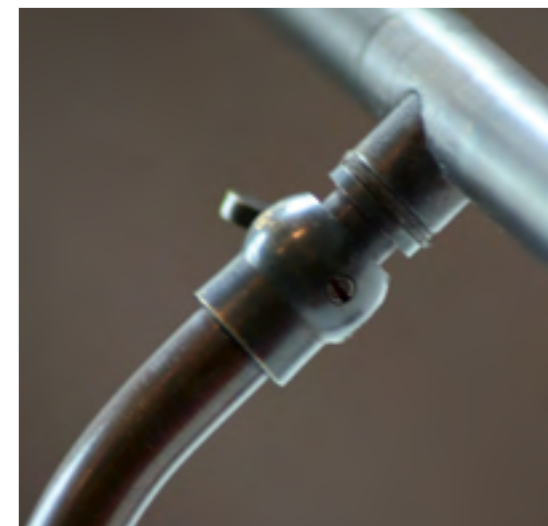

*Le peintre impressionniste Claude Monet a peint ses œuvres les plus importantes entre 1860 et 1890. Monet a été le fondateur d'un style à l'époque sous-apprécié. La finesse de notre éclairage de peinture de la collection MONET, focalise surtout l'attention sur l'œuvre plutôt que l'appareil lui-même. En reliant les appareils que vous pourrez atteindre la longueur qui convient le mieux à la largeur des peintures. Selon les couleurs de la peinture, vous pouvez opter pour plus ou moins de lampes et ainsi déterminer l'intensité de la lumière. Vous avez le choix entre différents type de mur, des couleurs et de bras.*

[EN]

The Impressionist painter Claude Monet painted his most important works between 1860 and 1890. Monet was the founder of an at that time, underappreciated style. Thanks to the finesse of our MONET collection's lighting, the focus is on the work rather than the fitting. By connecting the devices you can find the right length to fit with the width of the paintings. Thanks to this one can also, depending on the colors of the painting opt for more or less lamps and thus determine the light's intensity. You have a choice between various wall types, colors and armsystems.

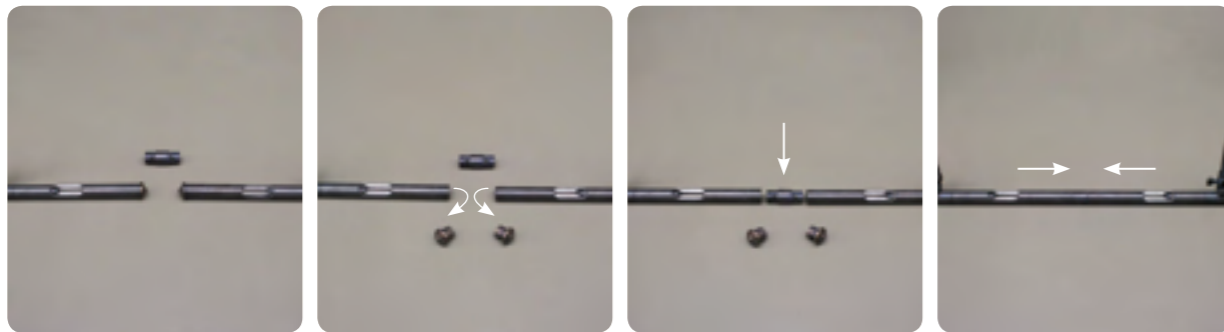

[DE]

*Der impressionistische Maler Claude Monet malte seine wichtigsten Werke zwischen 1860 und 1890. Er war der Gründer eines bis dahin ungeschätzten Stiles. Durch die Feinheit unserer MONET Kollektion Gemäldebeleuchtung schenkt diese dem Werk mehr Aufmerksamkeit als der Armatur selber. Indem man die Geräte verbindet, kann man die Länge erhalten, die sich am besten eignet für die Breite der Gemälde. Auch kann man sich so abhängig von den Farben des Gemäldes entscheiden für mehr oder weniger Lämpchen und so die Lichtstärke bestimmen. Sie können wählen aus verschiedenen Wandunterlagen, Farben und Armsystemen...*

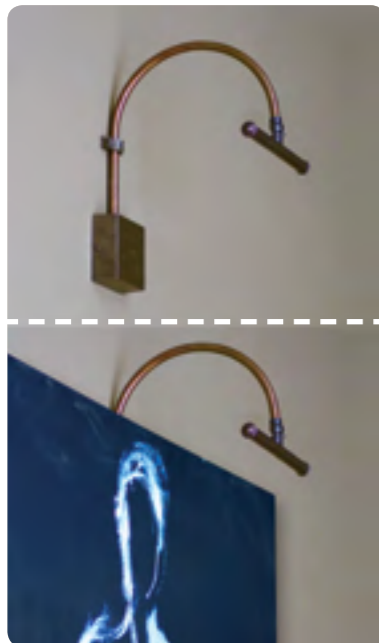

Connection to desired size and lightoutput.

Our monet connection piece makes this collection endlessly extendable...

1. Take 2 or more of the same Monet fixtures and the connection piece.
2. Take the 2 end pieces of the Monet
3. Put the connection piece in between.
4. Add the two Monets together and make them one long piece.

Monet Invisible base

Monet on Invisible square base with transformer for 2 x 20watt 12V lamp, with wall/tube fixing behind painting.  
 Base 7/7cm Depth = 20 cm Depth behind painting = 3 cm
