Step 1

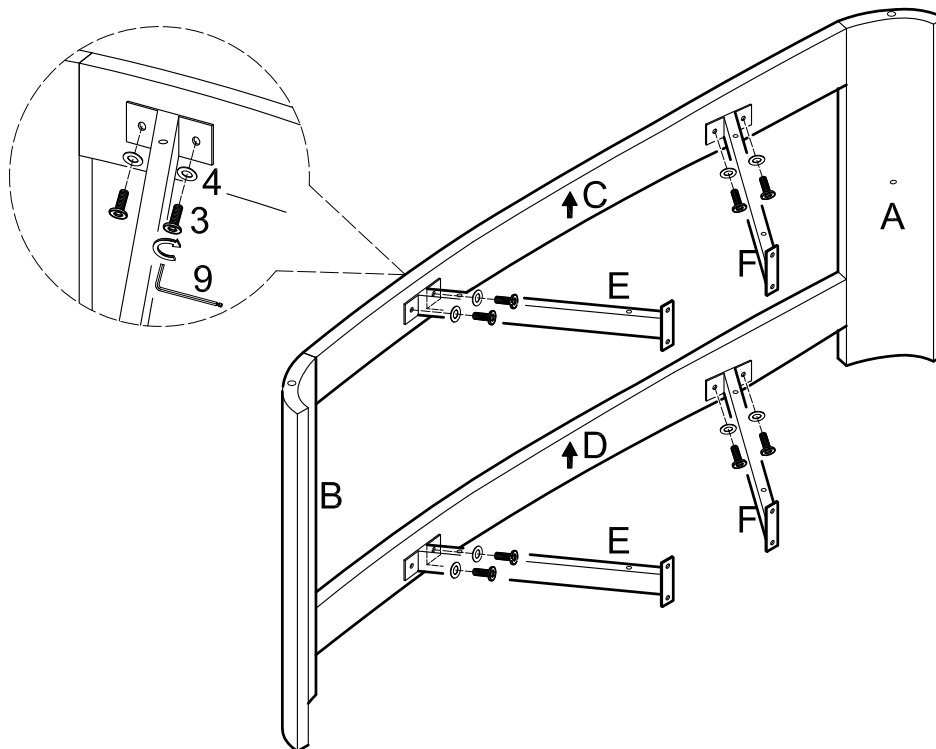

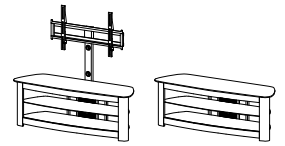

Screw cam bolts (1) into legs (A, B) .

Step 2

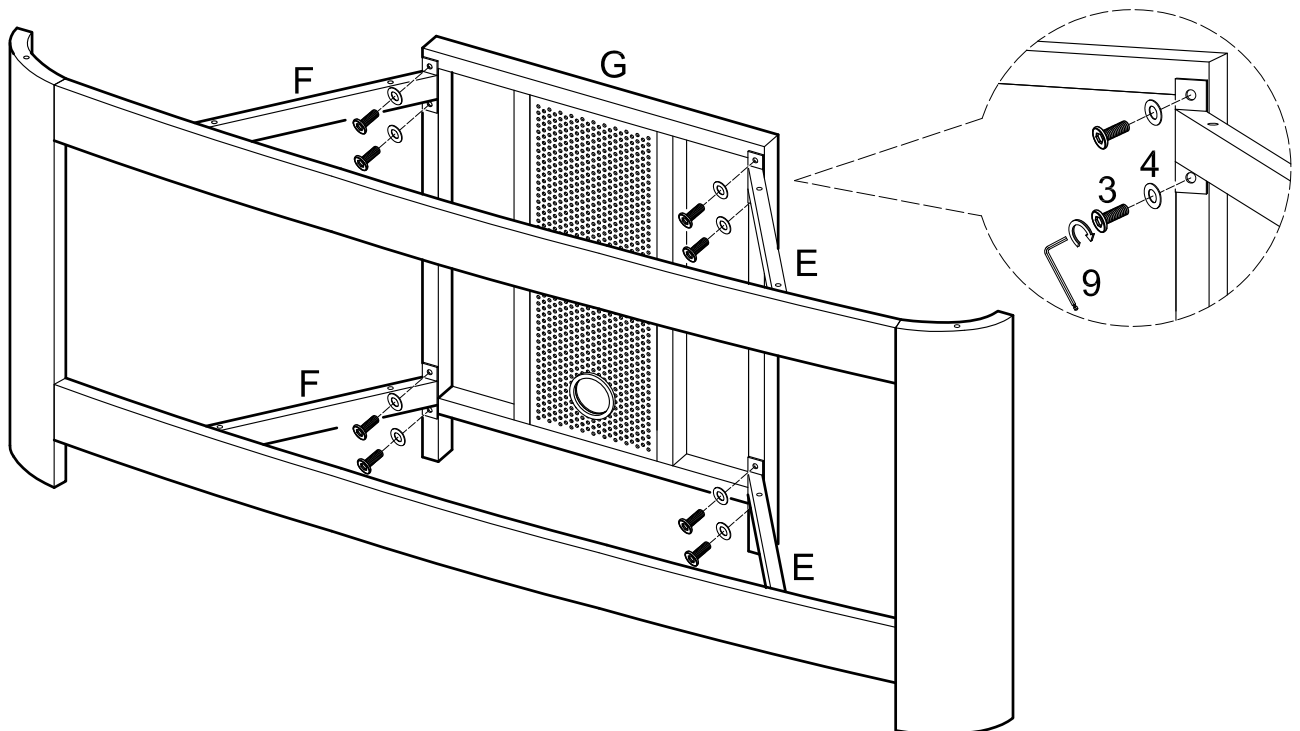

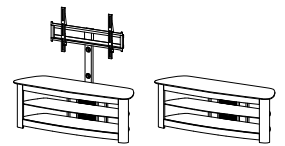

Insert cam locks (2) into front panels (C, D) . Attach legs (A, B) to front panels (C, D) using cam bolts as guides. Tighten cam locks (2) with a screwdriver.

Step 3

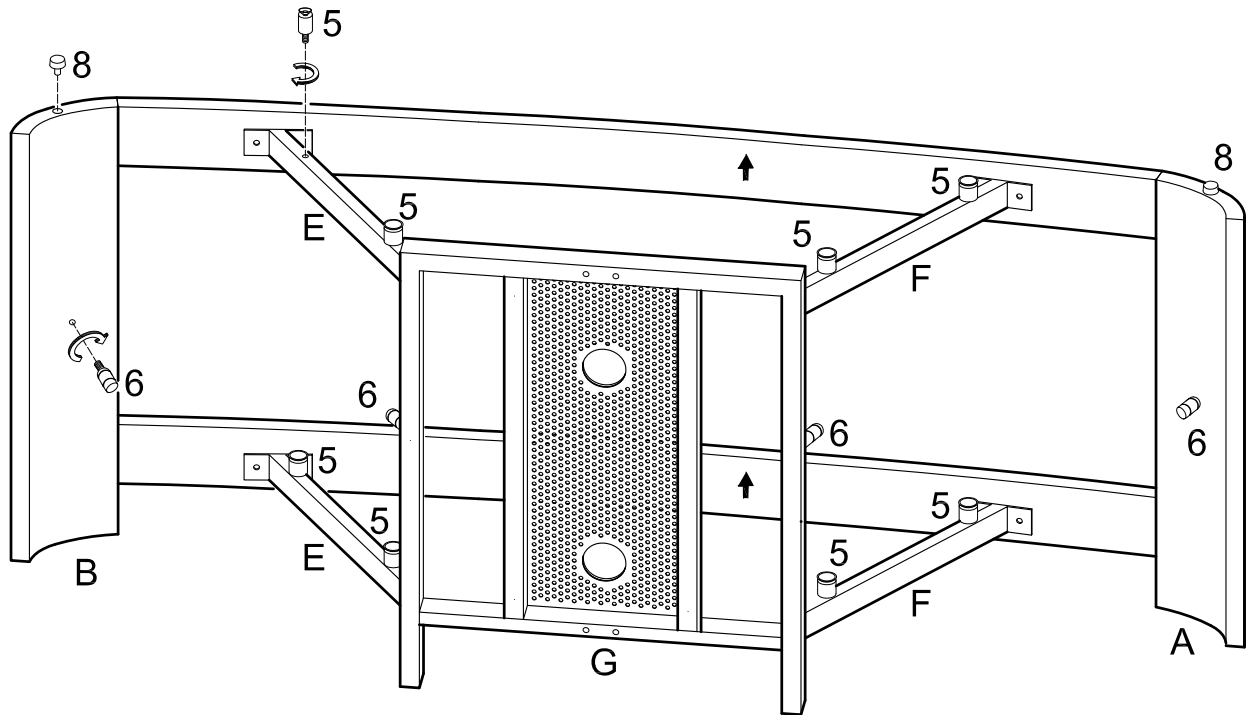

Attach crossbars (E,F) to front panels (C,D) using bolts (3) and washers (4). *Note that the predrilled holes on the lengths of crossbars (E,F) will face up.* Tighten bolts (3) with wrench (9).

Step 4

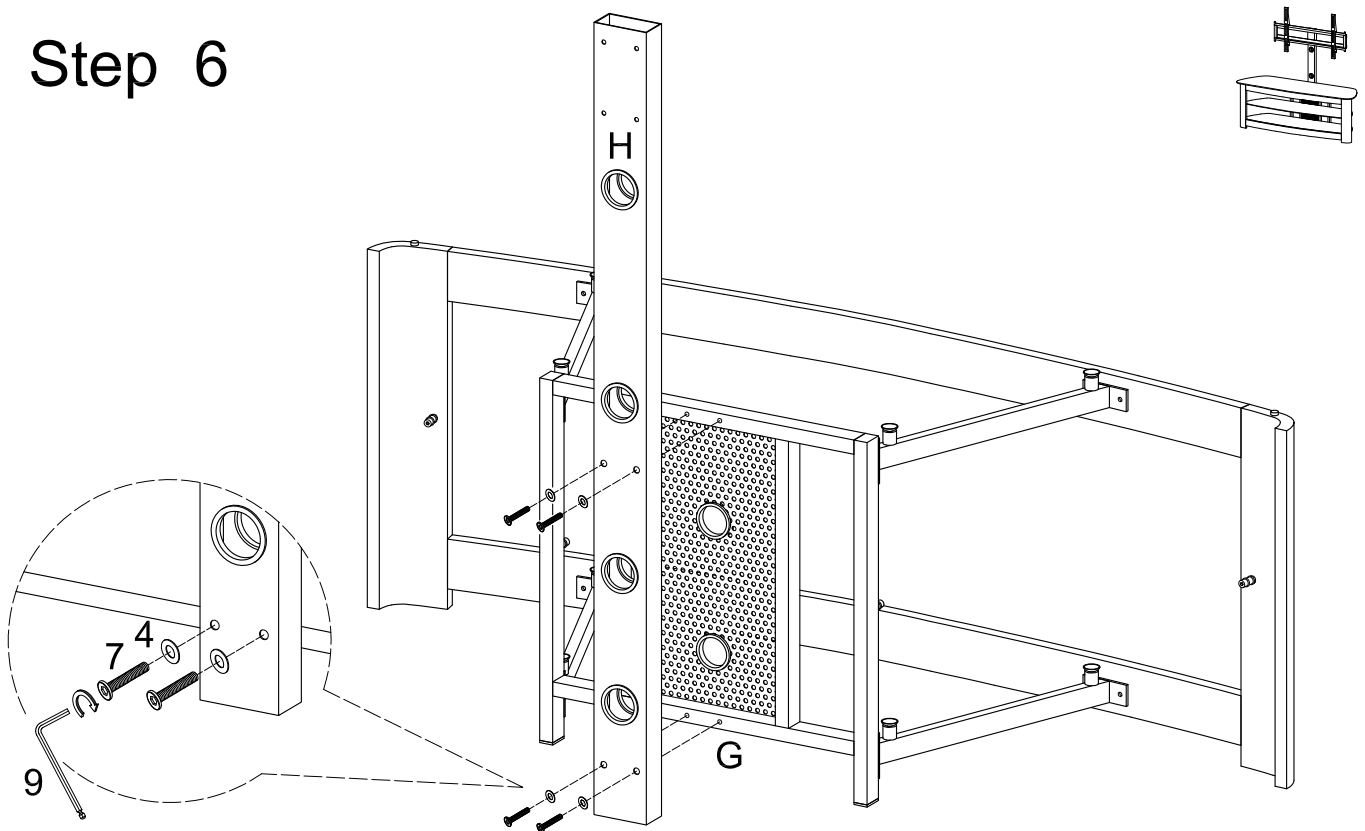

Attach crossbars (E,F) to lower cable management system (G) using bolts (3) and washers (4). *It may be necessary to slightly loosen the bolts from Step 3 in order to align crossbars (E, F) properly.* Tighten all bolts (3) with wrench (9).

Step 5

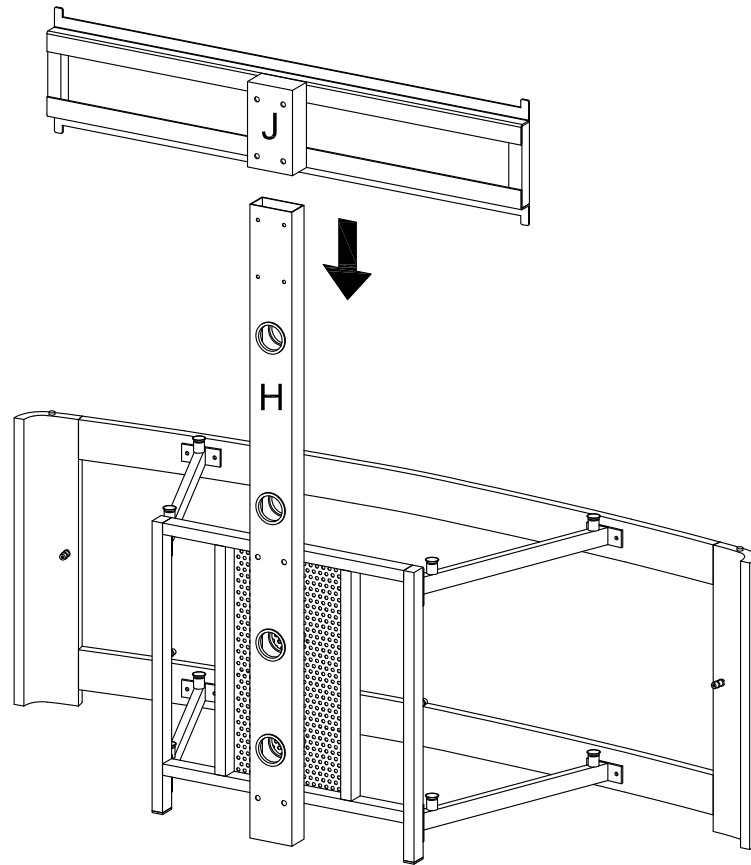

Screw suction cup pins (5) into crossbars (E, F). Gently screw pins (6) into legs (A, B) and lower cable management system (G). **Do not use wrench to tighten pins (6), hand tighten only.** Insert rubber pads (8) into legs (A, B).

Step 6

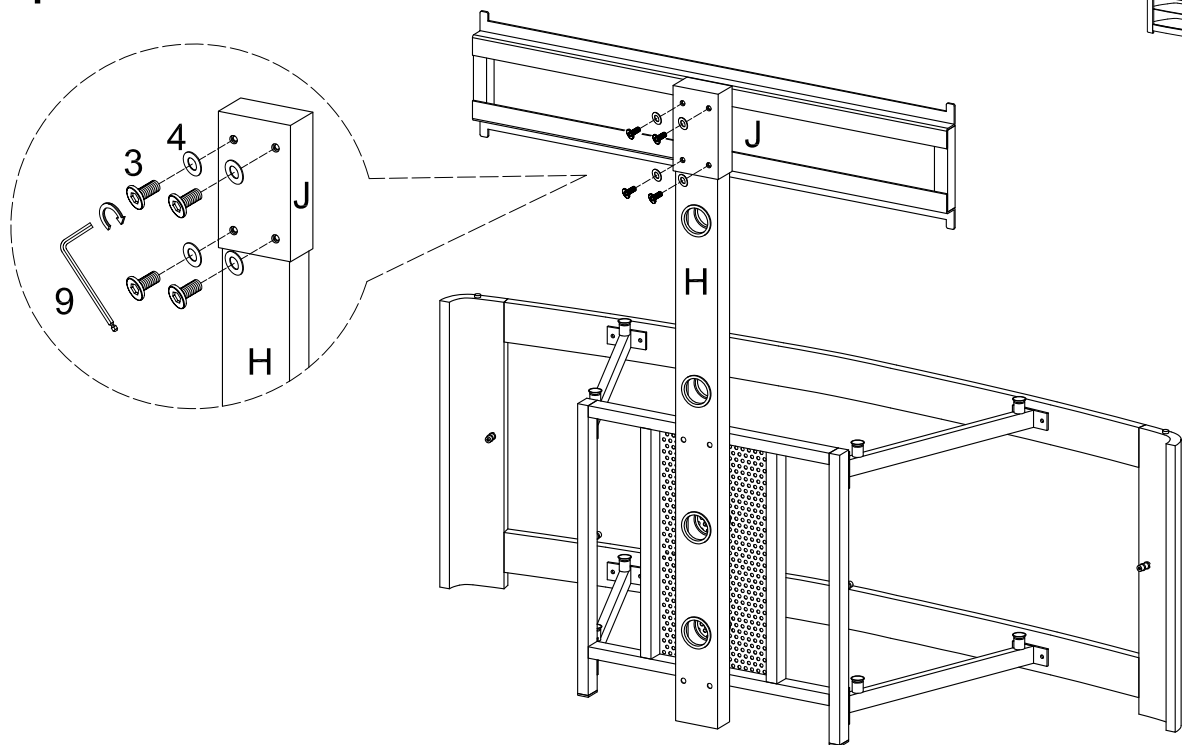

Attached the Upper Cable Management (H) to the back of the Lower Cable Management (G) and secure it with the Washers (4), Bolts (7) and the Wrench (9)

Step 7

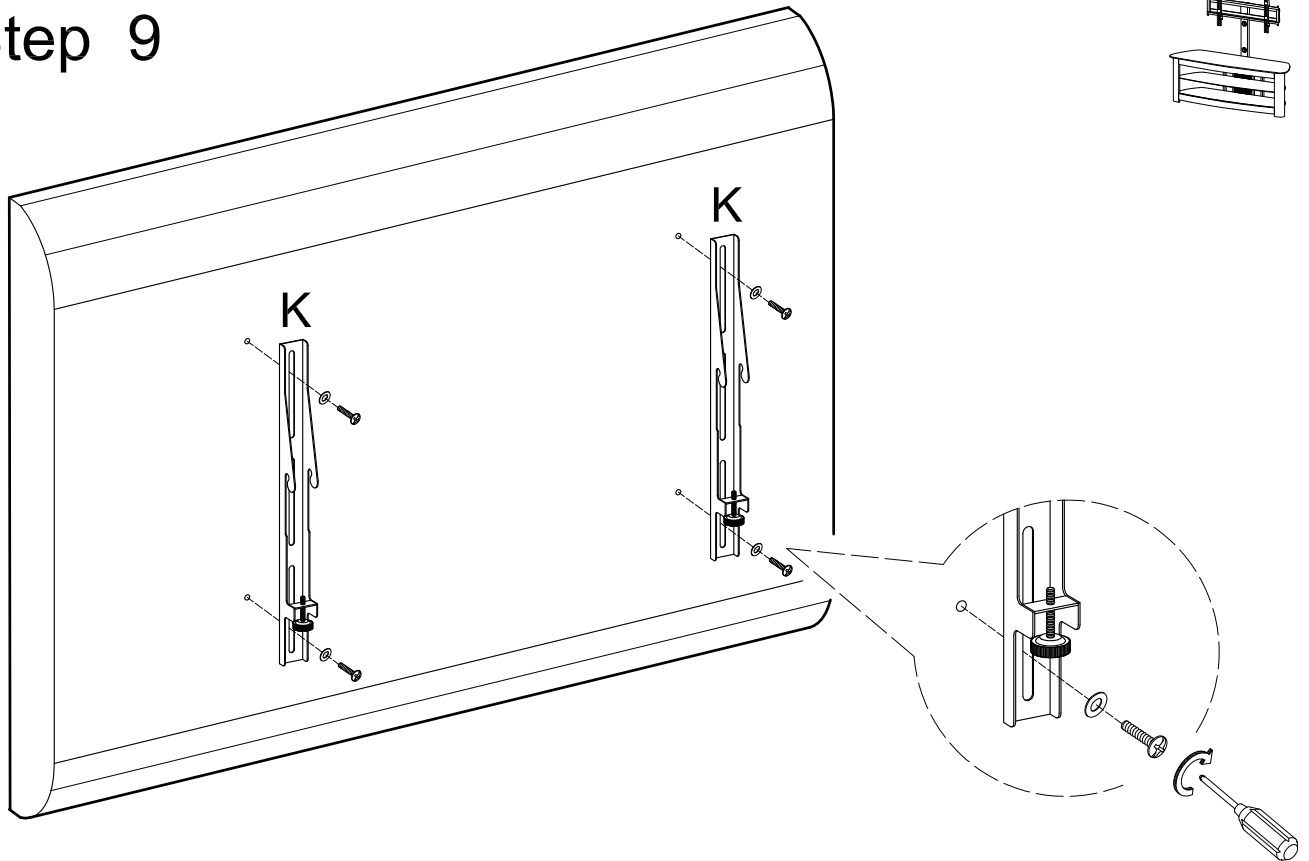

Insert the TV Bracket (J) to the top of the Upper Cable Management (H)

Step 8

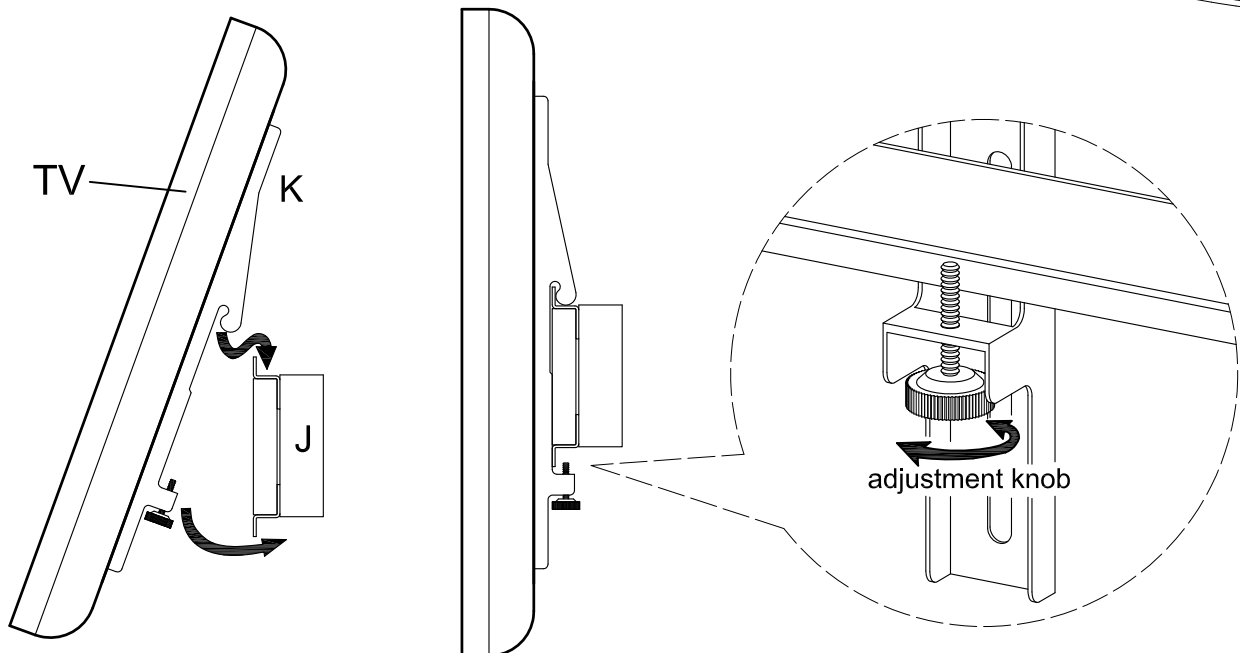

Use Washers (4), Bolts (3) and the Wrench (9) to secure the TV Bracket (J) to the unit.

Step 9

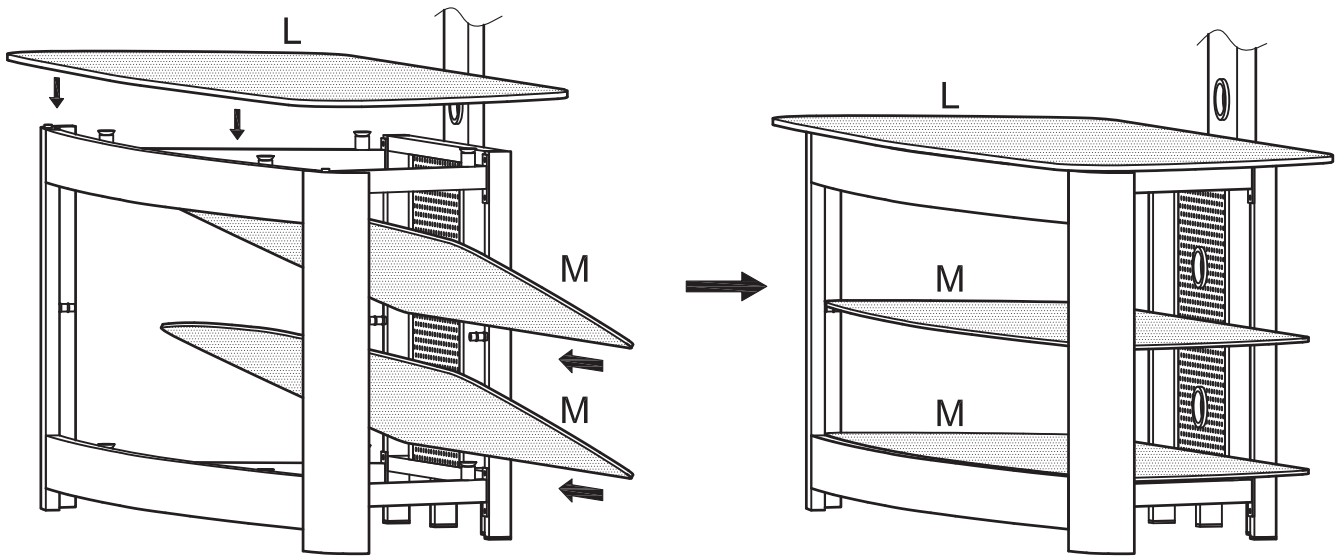

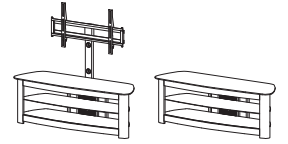

Attach Mounting Brackets (K) to the back of the TV using the appropriate hardware from the TV mounting hardware kit. Hardware may vary to the TV model you are using.

Step 10

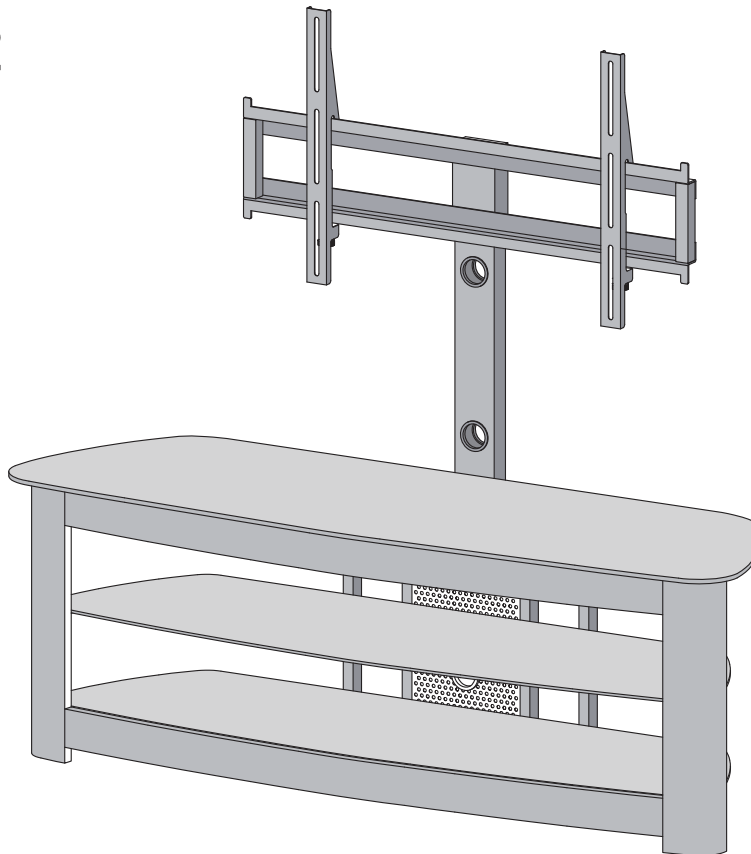

Loosen the adjustment knobs at the base of mounting brackets (K). Hang the mounting brackets to the base bracket (J) carefully. Tighten the adjustment knobs at the base of mounting brackets (K) to secure the TV to mount.

Step 11

Place top glass (L) carefully into position on top of the stand. Slide the middle glass (M) carefully into position from the side as shown in the diagram.

Step 12
