

PRODUCT DIMENSIONS

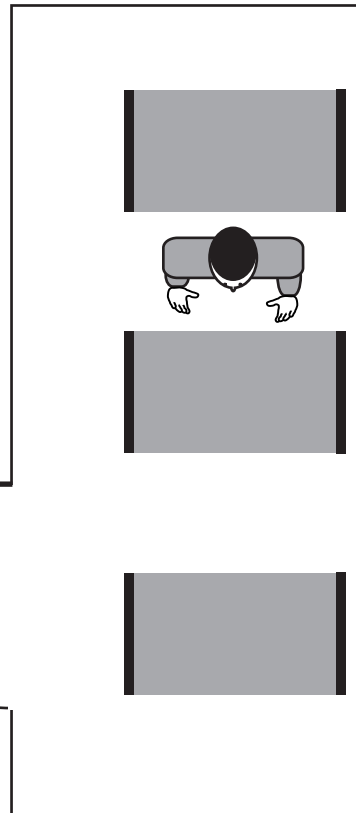

- A** 35"
- B** 20"
- C** 75-3/4"

Shelves adjust at 6" intervals

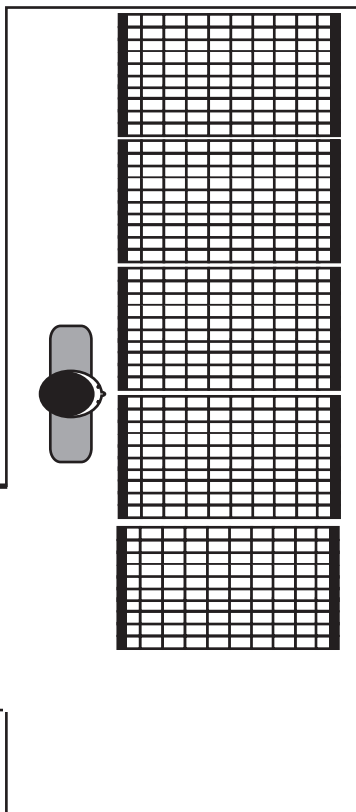

Traditional Shelving Units

With traditional, fixed shelving, much floor space is lost in order to create aisle ways. Access to all shelving in limited and narrow storage spaces cannot hold many shelving units. Solid shelves collect dust, and need routine cleaning.

Movable Storage Carts from Buddy Products

Great for narrow storage areas. Carts can be stored tight to save space, and are sized to fit easily through any doorway. The ease of moving the carts allows for up to **60% more floor space** to be utilized.

Casters allow easy movement of carts from the back to the front, creating aisle ways for access to every shelf in the room, from either side. Wire shelves do not collect dust, making for a clean, maintenance free storage space.
