Elmosoft Leather

Elmosoft is a soft and pliable semi-aniline leather. Outstanding comfort combined with excellent durability and an extensive array of colors makes it very suitable for the public environment. Visible insect bites and scars from healed wounds add to the elegant character of the leather.

Raw material: Grain leather from Scandinavian cattle. All Elmo leather is dyed through and tested at Elmo's laboratory. A hide is selected at random from every batch of finished leather and checked in accordance with the following:

- Color fastness to light
- Wet-rubbing
- Dry-rubbing
- Sweat-rubbing
- Finish-adhesion
- Tear-strength
- Thickness
- Flame-resistance
