Fixture Type:

Part Number:

HIGH-LINE VARIO TIGHTENING SET

Description:

The High-Line Vario Tightening Set makes runs of almost any angle possible. Similar to the standard tightening set, twisting the center piece tightens the cable firmly with little effort. The added feature of the Vario is the ball joint which gives the screw tensioner a very high degree of angular freedom and allowing it to easily adapt to highly angled cable runs.

Part Numbers:

150535ch chrome

150536mc matte chrome

Technical Specs:

Not suitable for mounting to ceiling supports
Insulated from mounting surface
