Replacement parts:

CSA certified to U.S. and Canadian standards. Suitable for wet locations.

Protection Class: IP65

Weight: 2.6 lbs.

Luminaire 5030LED:

Housings: Garden luminaire with earth spike made of glass-fiber reinforced polyamide synthetic. Opal glass with screw neck and silicone gasket.

Electrical: 3.2W LED luminaire, 5 total system watts, -30°C start temperature. Integral 12V AC driver provided. Standard LED color temperature is 3000K with an 85 CRI.

IMPORTANT: For use with magnetic landscape transformers ONLY.

Warranty: 3 year manufacturer warranty

Notice to Installer for 5030LED:

WARNING: LEDs are high-quality electrical components. Please avoid opening upper electrical compartment and do NOT touch LED module.

1. Compatible for use with 12-24V AC input voltage.

- 2. Voltage must NOT drop below 10V.
- 3. Turn main power OFF before start of installation.

5030LED installation:

- 1. Make sure glass is snugly tightened to luminaire threads.
- Push the luminaire with earth spike vertically into soil until proper stability of the luminaire is achieved. Compact surrounding soil accordingly.
- 3. Bring 12V-24V (AC) supply wiring to the luminaire leads. Make luminaire and supply wire connections. For maximum wire run lengths, see table to the right.
- 4. Bury supply wiring cable in trench.
- 5. Connect supply wiring to main power. Turn main power on.

| Max. Run Length (ft) Per Wire Size: 2 Volt drop | | | | | |
|---|-----------------|-----|-----|------|------|
| Connected | Wire Size (AWG) | | | | |
