# OPERATIONAL INSTRUCTIONS

## LOAD ADJUSTMENT

To increase the intensity of your workout, turn the T KNOB(14) clockwise. To decrease the resistance, turn the T KNOB(14) counterclockwise.

## WORKOUT FUNCTIONS

Your **inSTRIDE CYCLE** can be used for both lower and upper body workouts. Both are effective for aerobic conditioning, for helping improve muscle strength in legs, arms, shoulders, and back and for improved circulation.

Adjust the tension by turning the T KNOB(14) until you feel the desired resistance. More tension will give you a more intense workout while less tension will give you a less intense workout. Exercise for at least 20 minutes a day, three times a week to see improvement in your fitness level. Pedal in a forward motion for half of your workout and change to a reverse motion for the rest of your workout.

**Lower Body:** You must always be seated when pedaling the **inSTRIDE CYCLE** with your feet. Choose a straight backed chair to get a workout similar to an upright stationary bike. Use a chair that slightly reclines to better work the abs like a recumbent bike.

**Upper Body:** Place the **inSTRIDE CYCLE** on a desk or tabletop. You can be seated or standing. Adjust the tension by turning the T KNOB(14), grasp the pedals with your hands and pedal.
