Solar Shed

Patent No. 5,937,591

10'x8', 10'x12', 10'x16' Building Instructions

-BEFORE YOU BEGIN-

First...

Read these instructions thoroughly before you begin assembly. Assembly is easiest if you follow the steps in the order shown.

In a drawing, a dotted line represents a part hidden from view (like a part under a panel).

Lumber is graded from only one side. Check the part for the most attractive face and make sure to face it to the outside.

Check all parts

Compare parts you have to the list(s) on page 5. If a part is missing, circle the part in question in the parts list and call us toll-free at 1-800-437-0784.

Assistance required

We recommend that you assemble this building on level ground in the location it will be used. Assistance is necessary to handle, fit, and secure some components. Two people are needed for some steps.

Squareness is very Important!

Keeping all 90° corners and 90° perpendiculars square throughout the assembly of this building will make each succeeding step easier and is necessary to assure that all components fit together properly.

Check local zoning

Before starting construction, check with your local building code official for any required permits, variances, etc. Our Storage buildings are designed to meet most national coding agencies strict testing requirements for storage space and are not meant to be used for living space.

Check foundation size

Before starting construction on your foundation, check in the instruction manual to ensure that you are building the correct size foundation for your building.

Always wear OSHA-APPROVED safety glasses throughout assembly process

Tools required

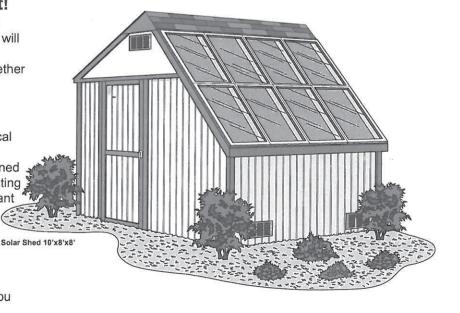

- Hammer
- Phillips Screwdriver
- Level
- □ Step Ladder
- □ Tape Measure
- Adjustable Wrench
- Electric Drill with ¹/₂" Drill Bits and #2 Phillips bit
- □ ¹/8" Allen Wrench

Optional tools

- Chalk Line
- Square
- Nail Pouch
- Wood Glue

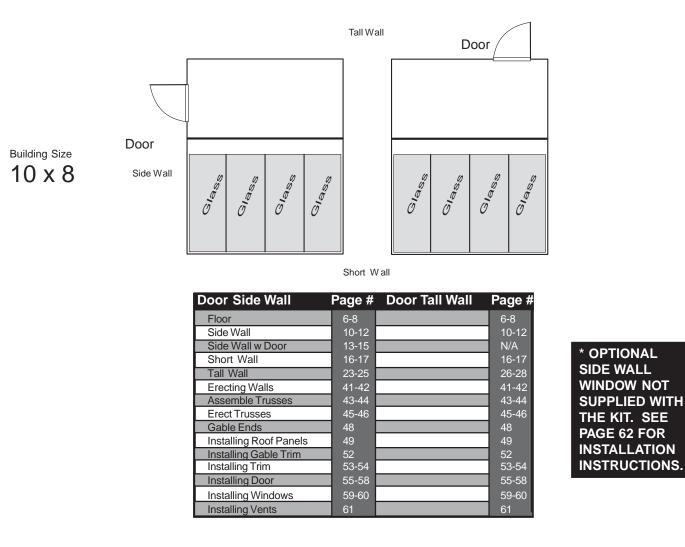

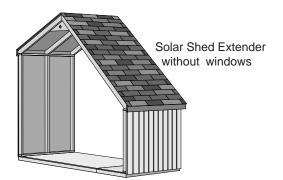

Building Layout

Your Solar Shed can be configured in a variety of ways. Available extender kits can increase the size of your building from 10' x 8' to 10' x 12' or 10' x 16'. Also, for added flexibility, the doors can be located on the side or tall wall.

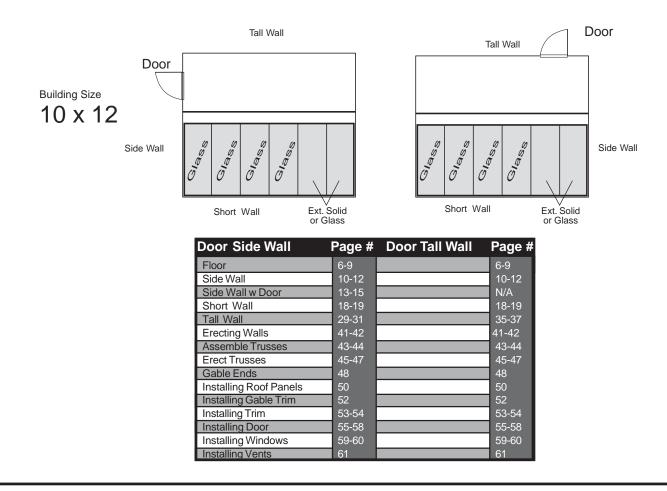

This booklet contains instructions for these different configurations. To aid you in constructing your building, the layout plans below show the available Solar Shed configurations. Locate the view that best matches the building and options you have purchased along with the configuration that best suits your needs. Then, use the accompanying index to identify and locate the assembly procedures for your building.

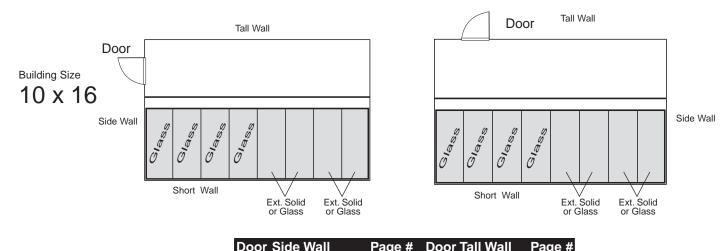

Extender kits can be solid roof or glass window.

Door Side Wall	Page #	Door Tall Wall	Page #

Installing Windows	59-60		59-60
Installing Vents	61		61

Solar Shed Helpful Hints!

The Location

Positioning of the Solar Shed in relation to your house or garden is an important consideration and unless your house or Solar already faces South you may be missing out on the solar benefits of the sun. To take advantage of solar gain, orient the Solar Shed so that the roof windows are facing southward. If you intend to use the Solar Shed for starting plants or growing into the late fall, it would be best to have it facing 15° East or West of true South.

More Location Hints

Check the site, to make sure it receives the most sunlight possible during daylight hours.

□ If your planing to use your Solar Shed as an office or workshop you may choose to face it away from the sun this will make things easier when trying to cool your Solar Shed in summer.

□ Your Solar Shed must be constructed on a level floor. Preparing the site will be considerably easier if you begin with fairly level ground.

□ Your building location must be on firm soil and must be free from any puddling or drainage problems

Leveling and Squaring

While constructing your Solar Shed, stop periodically to check that the building is level and square. Advancing from one step to the next without checking for squareness may result in increased difficulty with subsequent steps.

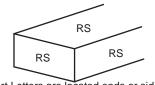

Painting and Weather Proofing

Your Solar Shed must be painted with a latex exterior paint within thirty days of assembly. If you intend to use the Solar Shed as a greenhouse, you must prime and paint the inside of the building as well as the wooden floor (provided your building has a wooden floor). Caulking is also a must and should be applied above door and all horizontal and vertical trim boards. Refer to your warranty for more detailed information on weatherproofing.

Important Notice

We pride ourselves in manufacturing kits from select construction grade lumber and engineered wood products. Construction grade lumber, a product cut from trees, has many natural characteristics and blemishes that may be present in some of the pieces you receive in your kit. Natural characteristics and blemishes in construction lumber may include knots, torn wood grain along edges, minor cracks/splits, twists, limited bark along edges and pitch pockets that may exude sap. Be assured that the individual parts have been cut and inspected to remove as many of the wood's natural, less appealing characteristics as possible. These characteristics and/or blemishes will not affect the strength, durability, or structural integrity of the finished product. Generally, the exterior trim parts selected for your kit are graded from only one side and should be installed with the most attractive side outward. Our limited warranty does not cover the natural characteristics and blemishes that occur with construction grade lumber products.

NATIONAL STA	NDARD LUMBER SIZES
Nominal size	Actual size
1 x 2 =	= 3/4" x 1-1/2"
1 x 3 =	
	= 3/4" x 3-1/2"
2 x 4 =	: 1-1/2" x 3-1/2"
2 x 6 =	: 1-1/2" x 5-1/2"

Part Letters are located ends or sides.

IMPORTANT!!! Building Tip

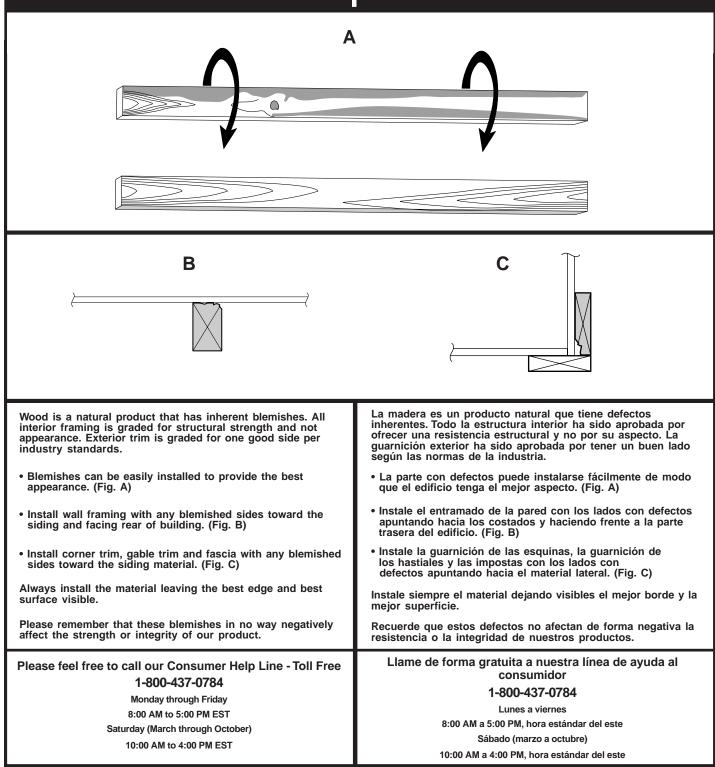

FOR THE BEST LOOKING FINISHED PRODUCT WE RECOMMEND THAT YOU INSPECT, SORT AND LAY OUT MATERIALS PRIOR TO BEGINNING ASSEMBLY OF YOUR BUILDING

SITE PREPARATION

SITE PREPARATION

- Site must be properly leveled.
- Site should have natural drainage to eliminate puddling under and around the building.
- Site should be covered with plastic film to discourage grass growth under the building and to serve as a vapor barrier.

Before assembling your building, you must first construct a floor system. You can:

- A. Purchase our optional pre-cut Floor Kit.
- **B.** Purchase materials to cut and build your own wooden floor from the parts list on Page 7 and Page 9 for extender building.

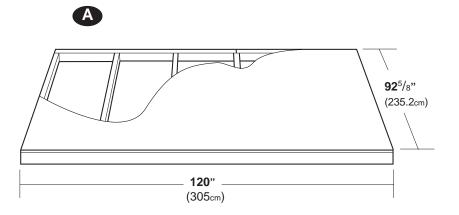

NOTE: Our Pre-cut Floor Kits have been designed for normal residential use. It is characteristic for the floor panels to deflect (flex) during normal use. If you intend to store very heavy objects in your building, you may want to consider adding floor joists to reduce the span from 24" on center to 16" or 12" on center.

OR

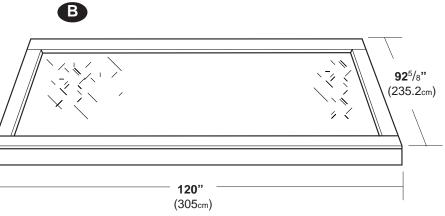

C. Install a 4" concrete slab floor system.

IF USING CONCRETE SLAB FLOOR SYSTEM

- Construct 4" Concrete Slab Floor System as shown.
- Bolt or nail 2 x 4 treated sill plates to the slab to support the building's frames and wall panels. (Treated sill plates not included.)
- Upon completion of above steps, skip "Floor Kit Assembly" section and proceed to Step #2: Assembling Rear Wall.

Slab Floor size for Extended Buildings

Phoenix 10 x 8 Floor Kit Instructions

Optional Floor Kit not supplied with Building Kit

For Handy Home optional Wood Floor Kit, refer to instructions included with floor. Floor Instructions maybe different from this manual. Parts Needed:

Č

Ď

ð

- A 2 - 48x92-5/8x5/8" Floor Panels В
 - 1 23-7/8x92-5/8x5/8" Floor Panel

Bond Boards D 72", and Floor Bond

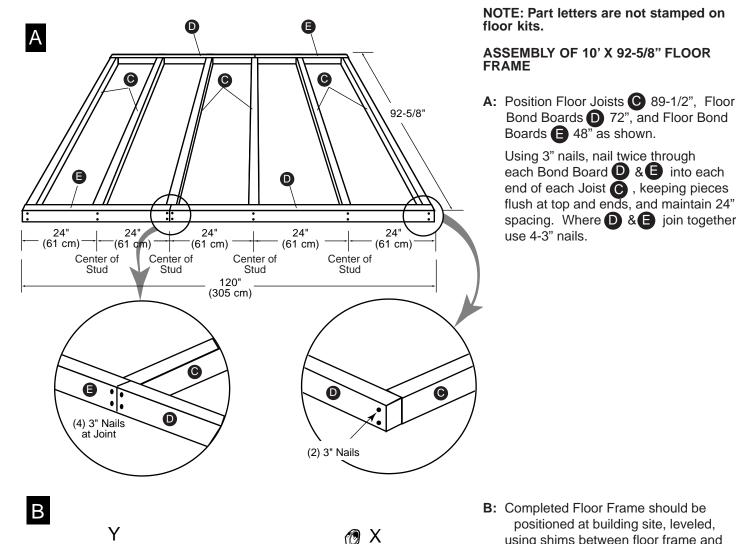

end of each Joist **()**, keeping pieces flush at top and ends, and maintain 24" spacing. Where **D** & **E** join together

Using 3" nails, nail twice through each Bond Board **D** & **E** into each

Boards **E** 48" as shown.

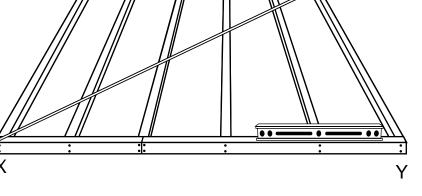

use 4-3" nails.

- 6 2x4x89-1/2" Floor Joist
- 2 2x4x72" Bond Boards
- 2 2x4x48" Bond Boards
 - 2" and 3" Nails

B: Completed Floor Frame should be positioned at building site, leveled, using shims between floor frame and ground before proceeding to Floor Panel Attachment.

Square frame by making corner-tocorner measurements (X to X and Y to Y) the same.

10 x 8 Floor Kit continued

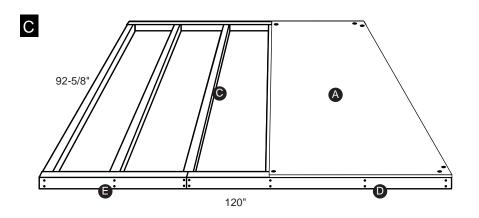

FLOOR PANEL ATTACHMENT:

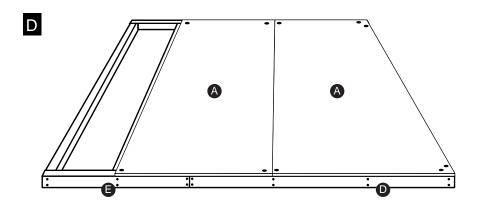

- C: Position a 48 x 92-5/8" Floor Panel A flush to the outside edges of sides and back of Floor Frame. Secure panel with two 2" nails at outside corners and one 2" nail at other corners.
- D: Position the other 48" x 92-5/8" Floor Panel A flush against first panel and flush to edges of Floor Frame. Secure panel with one 2" nail at each of the four corners.
- E: Position the 23-7/8" x 92-5/8" Floor Panel B flush against second panel and flush to edges of Floor Frame. Secure panel with two 2" nails at outside corners and one 2" nail at each of other corners.

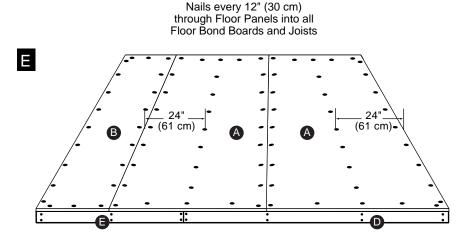

With Floor Panels flush to outside edges of Floor Frame, nail with 2" nails every 12" through Floor Panels into all Floor Bond Boards **D** & **E** and Floor Joists **C**.

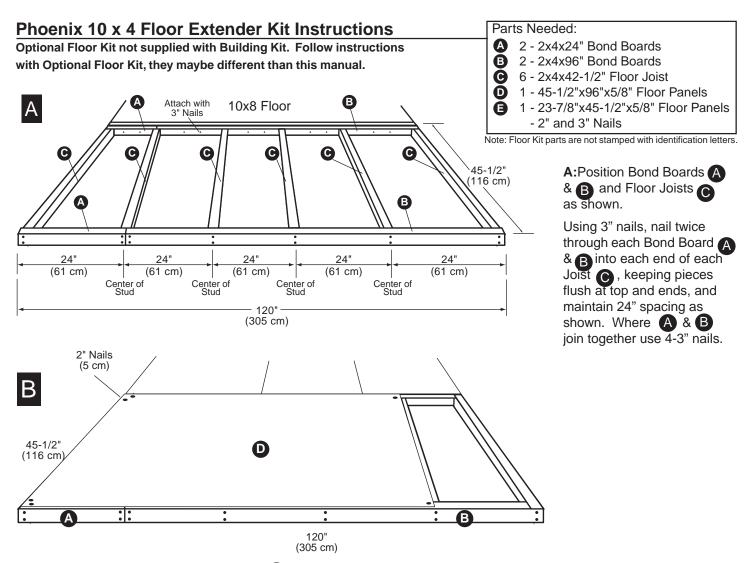

Note: Mark a line on the Floor Panel over the center of each Floor Joist @ 24" using a pencil and a piece of lumber from the kit (or use a chalk line) to make nailing easier.

> Your Floor is now complete. Check to be sure it is properly positioned and leveled to ground before beginning assembly of your Handy Home Wooden Storage Building.

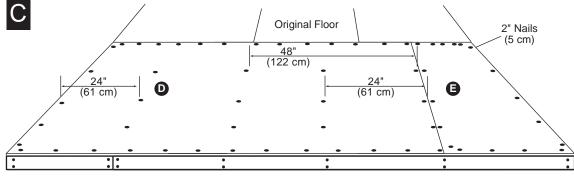

B: Position a 45-1/2" x 96" Floor Panel **D** flush to the outside edges of sides and back of Floor Frame. Secure panel with two 2" nails at outside corners and one 2" nail at other corners.

Nails every 12" (30 cm) through Floor Panels into all Floor Bond Boards and Floor Joists

C: Position a 23-7/8" x 45-1/2" Floor Panel **(**) flush against first panel and flush to edges of Floor Frame. Secure panel with two 2" nails at outside corners and one 2" nail at other corners.

Note: Mark a line on the Floor Panel over the center of each Floor Joist using a pencil and a piece of lumber from the kit (or use a chalk line) to make nailing easier.

With Floor Panels flush to outside edges of Floor Frame, nail with 2" nails every 12" through Floor Panels into all Floor Bond Boards and Floor Joists.

Your Floor is now complete. Check to be sure it is properly positioned and leveled to ground before beginning assembly of your Wooden Storage Building.

No Door **1** Side Wall Assembly

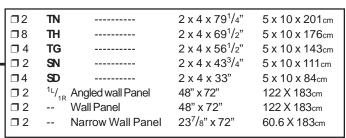

Note: Before beginning assembly, Door Placement, Optional Window Placement, and Building Size must be determined.

Refer to page 2 & 3 before beginning assembly.

 Arrange 1- TN, 4- THs, 1- SN, 2- SDs, and 2-TGs as shown.

A Nail parts together using two 3" (6.7cm) nails at each connection.

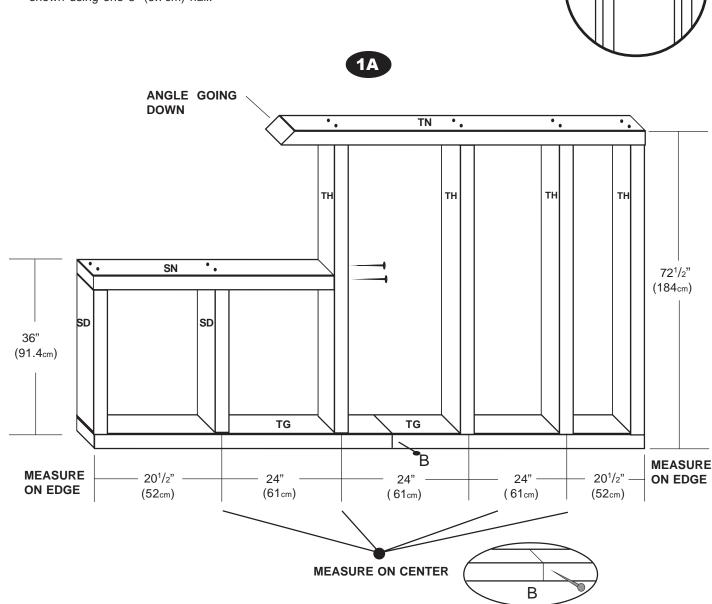

B Be sure to nail both **TG**s together as shown using one 3" (6.7cm) nail.

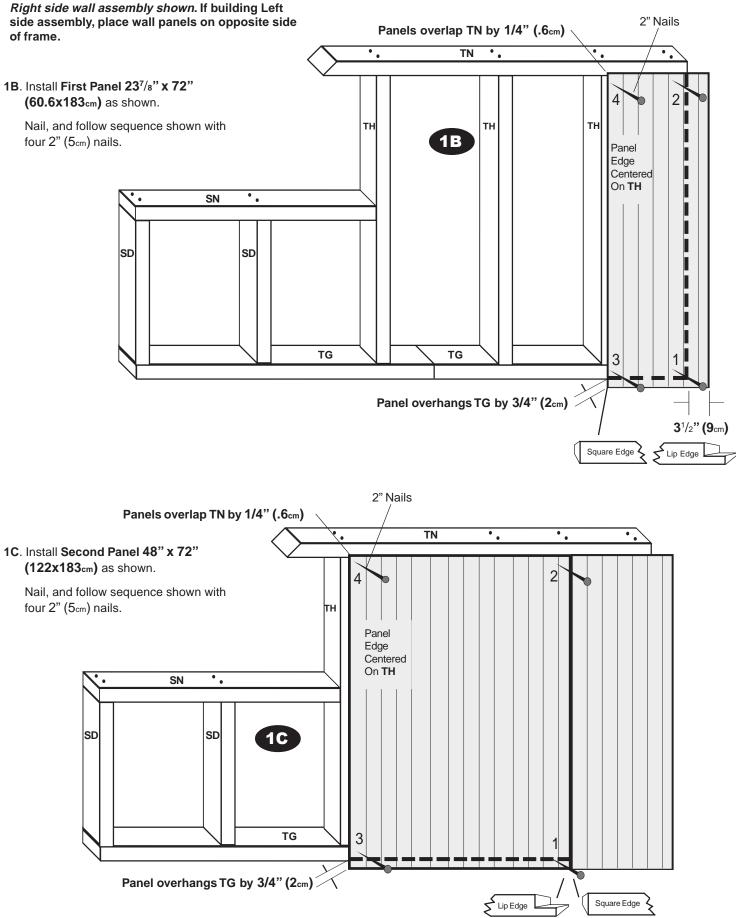

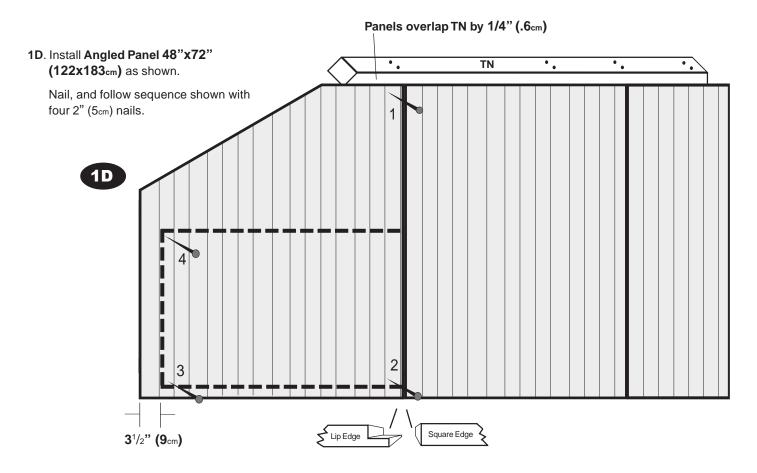

This Parts List contains enough parts to build 1-Left and 1-Right Side Wall Panel.

* Refers To Step Panel is Used

3A. Arrange 1- **VO**, 2 - **VD**, 11 - **TH**s, 1- **UL**, 1- **SC** and 2 - **SR** as shown.

A Nail parts together using two 3" (6.7cm) nails at each connection.

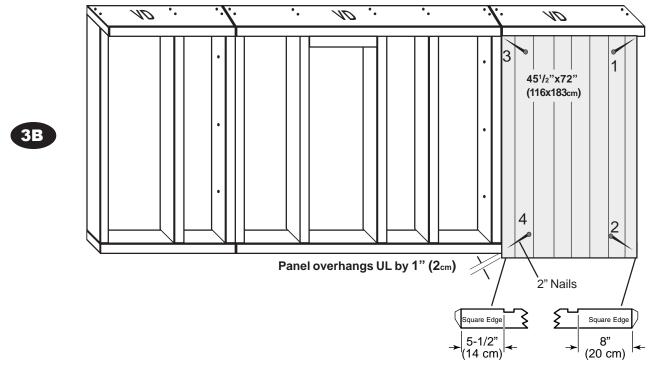

3B. Install First Panel 451/2"x72"

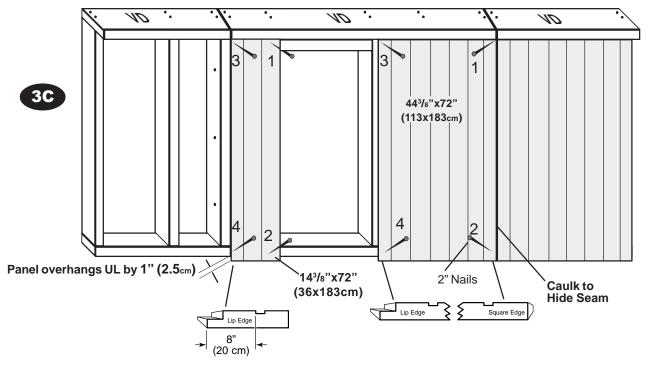

(116x183cm) as shown.

Nail, and follow sequence shown with four 2" (5_{cm}) nails.

3C. Install Second Panel 44³/₈"x72" (113x183cm) and Third Panel 14³/₈" x 72" (36x183cm) as shown.

Nail, and follow sequence shown with four 2" $(5_{\mbox{cm}})$ nails.

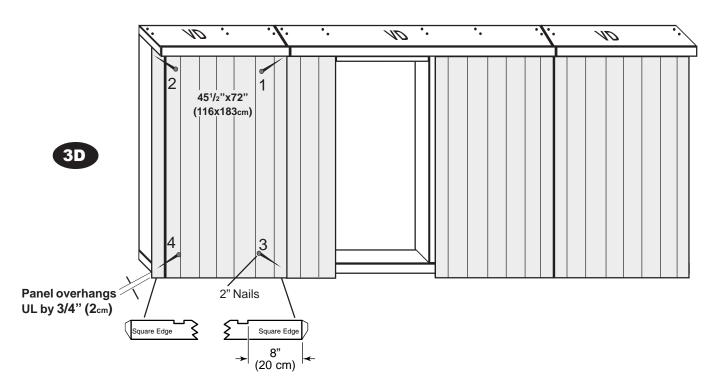

Extended Tall Wall

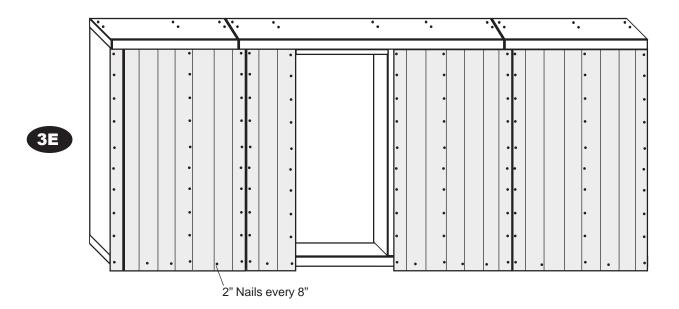

3B. Install **Fourth Panel 45**¹/₂"**x72**" (116**x**183_{cm}) as shown.

Cont.

Nail, and follow sequence shown with four $2^{"}$ (5cm) nails.

3E. Once all panels are in place secure to frame using 2" (5cm) nails spaced every 8" (20cm).

□2 Assembled Side Walls □1 Assembled Tall Wall □ 1

4A

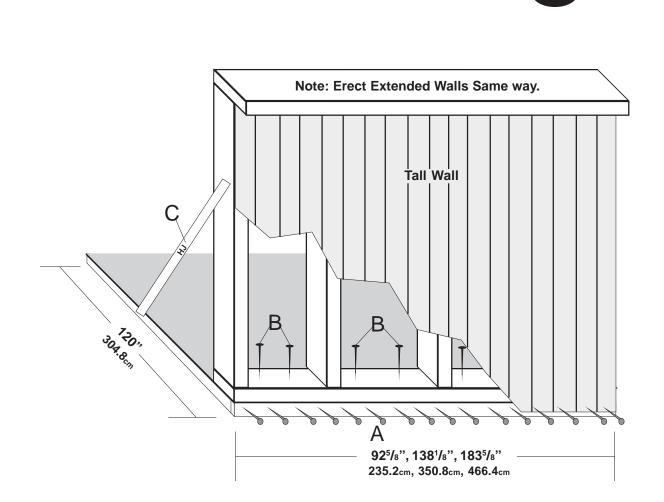

Assembled Short Wall

4A. Stand Tall Wall as shown.

Nail 3/4" (2cm) overhang to floor using Α 2" (5cm) nails spaced 12" (30cm) apart.

B Nail frame to floor using 3" (7.6cm) nails as shown.

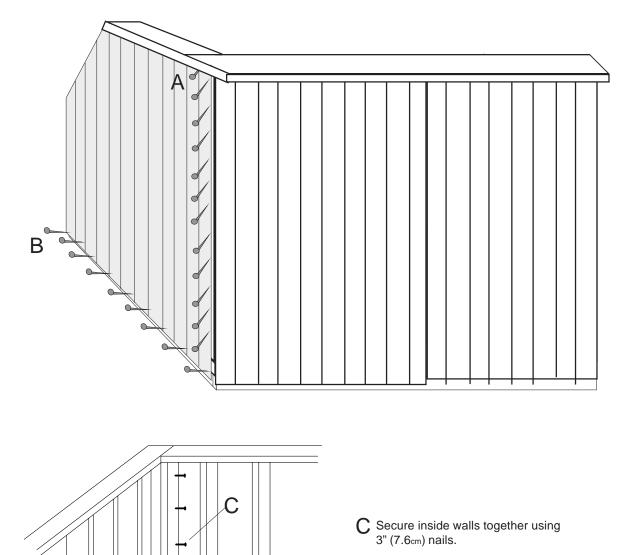

C Making sure wall is vertically level, temporarily secure HJ for support as shown.

4B. Position Right Side Wall Assembly as Shown.

A Secure Side Wall to Tall Wall using 2" (5cm) Nails.

B Nail 3/4" (2cm) overhang to floor using 2" (5cm) nails spaced 12" (30cm)apart.

D Nail frame to floor using 3" (7.6_{cm}) nails as shown.

Repeat these steps for the remaining side and back wall panels

7 Gable E	nds
------------------	-----

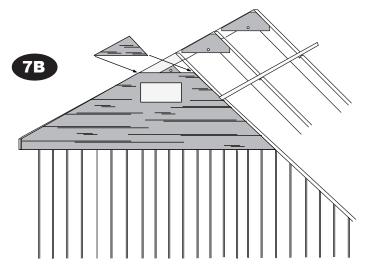

2	¹ L/ _{1R}	Gable Panels
□2	¹ L/ _{1R}	Gable Spacer

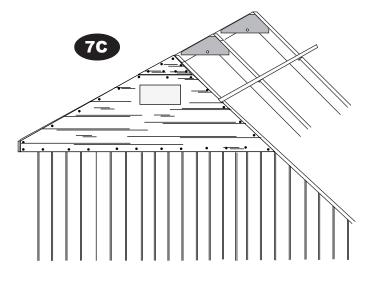

NOTE: A 1/2" PVC or Copper Pipe may be inserted into gusset holes for hanging plants (Piping not included in Kit).

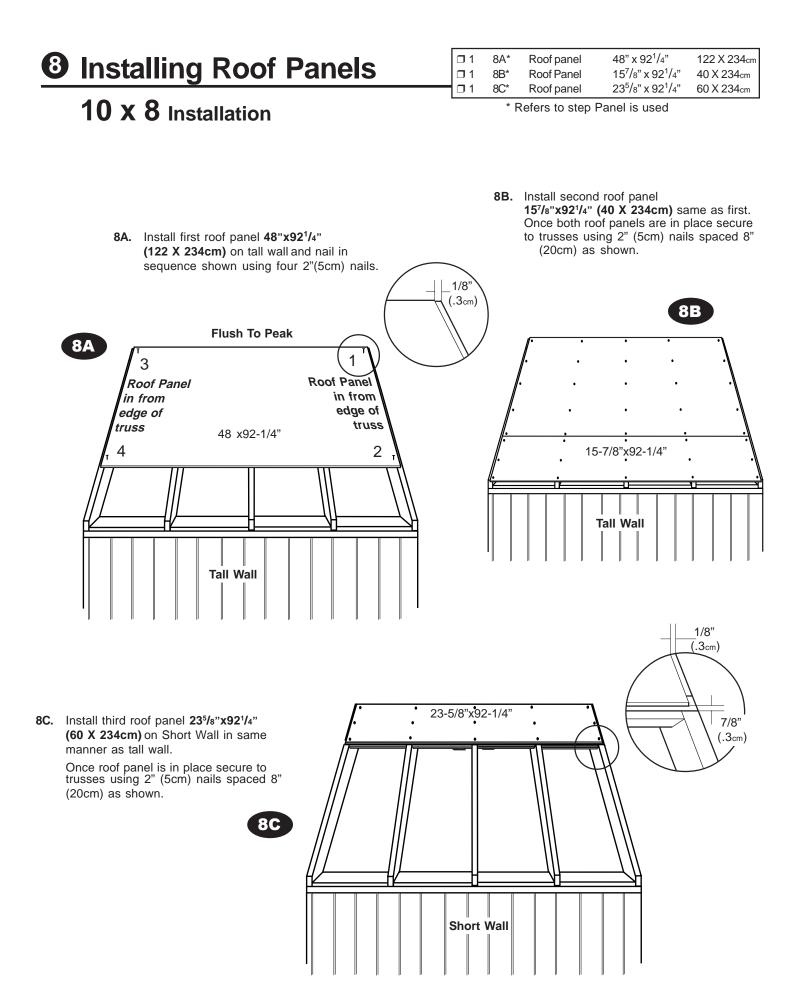

- **7A.** Place **Gable Panel** as shown and nail in place using 2" (5cm) nails spaced 8" (30cm).
- **7B.** Place **Gable Spacer** above gable panel as shown and attach using five 2"(5cm) nails.
- 7C. Completed Gable End.

Repeat same steps for opposite side of building.

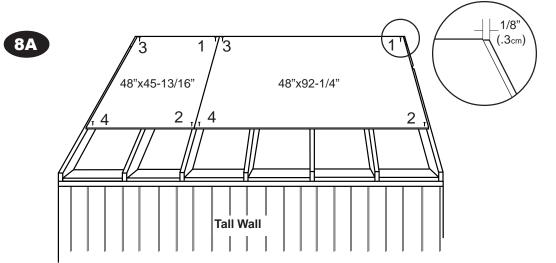

Installing Roof Panels

10 x 12 Installation

□1	8A*	Roof panel	48 x92¹/₄"	122X234cm		
□1	8A*	Roof panel	48 x45 ¹³ / ₁₆ "	122X116.4cm		
□1	8B*	Roof Panel	15 ⁷ /8 x92 ¹ /4"	40X234cm		
□1	8B*	Roof Panel	15 ⁷ /8 x45 ¹³ /16"	40X116.4cm		
□1	8C*	Roof Panel	23 ⁵ /8 x92 ¹ /4"	60.6X234cm		
□1	8C*	Roof Panel	23 ⁵ /8 x45 ¹³ /16"	60.6X116.4cm		
□1	8C*	Roof panel	72 x45 ¹³ / ₁₆ "	183X116.4cm		
Substitute 2 Glass Panels for Glass Extender on the above item.						
	*	Refers to step	o Panel is used			

8A.Install first roof panel **48"X 92**¹/4" (**122 X 234**cm) on tall wall, and nail in sequence shown using four 2"(5cm) nails. Next install **48"x 45**¹³/16" (**122 x 16.4**cm). Nail in sequence shown using four 2"(5cm).

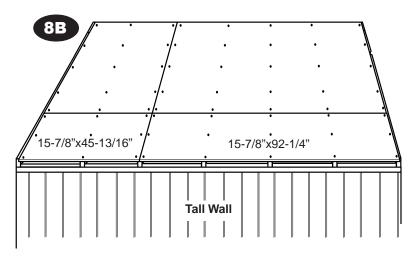

8B.Install lower roof panels along tall wall using one $15^7/8$ X $92^1/4$ (40 X 234cm) and one $15^7/8$ X $45^{13}/16$ (40 X 116.4cm) in the same manner as step 8A.

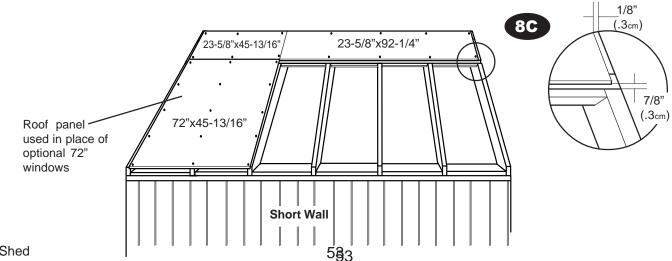

Once all roof panels are in place secure to trusses using 2" (5cm) nails spaced 8" (20cm) as shown.

8C.Install upper roof panels along short wall as shown using one $23^5/s^{"}X92^1/4^"$ (60 X 234_{cm}) and one $23^5/s^{"}X45^{13}/_{16}"$ (60 X 116.4_{cm}). Nail to trusses in same manner as step 8A and 8B.

FOR SOLID ROOF EXTENDER

Install lower roof panel along short wall as shown. Use one **72"x45**¹³/16" (**183x116.4**cm). Substitute 2 glass panels for glass extender.

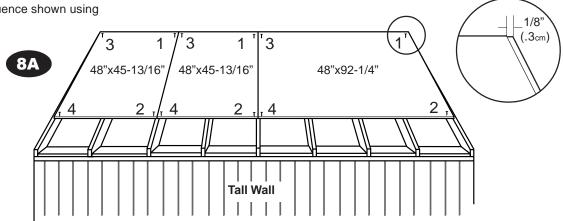

Installing Roof Panels

10 x 16 Installation

8A. Install first roof panel 48"X 92¹/4" (122 X 234cm) on tall wall, and nail in sequence shown using four 2"(5cm) nails. Next install two 48"x 45¹³/₁₆" (122 x 116.4cm). Nail in sequence shown using four 2"(5cm).

□ 1	8A*	Roof panel	48 x92 ¹ /4"	122X234cm
□2	8A*	Roof panel	48 x45 ¹³ / ₁₆ "	122X116.4cm

□2	8C*	Roof panel	72 x45 ¹³ /16"	182X116.4cm
	Substitu	ute 2 Glass Panels f	or Glass Extender.	

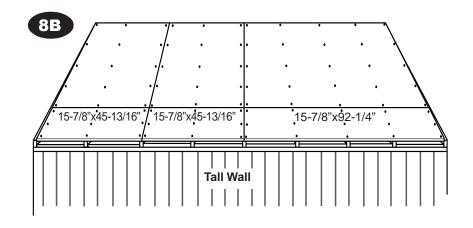

8B. Install lower roof panels along tall wall using one 15⁷/s[°]X 92¹/4[°] (40 X 234cm) and two 15⁷/s[°]X 45¹³/16[°] (40 X 116.4cm) in the same manner as step 8A.

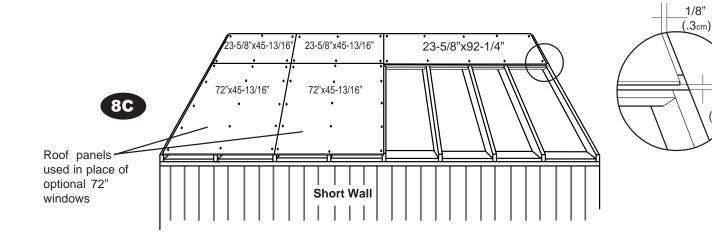

Once all roof panels are in place secure to trusses using 2" (5cm) nails spaced 8" (20cm) as shown.

8C. Install upper roof panels along short wall as shown using one $23^{5}/s^{"}X92^{1}/4^{"}$ (60 X 234cm) and two $23^{5}/s^{"}X45^{13}/_{16}$ " (60 X 116.4cm). Nail to trusses in same manner as step 8A and 8B.

FOR SOLID ROOF EXTENDER

Install lower roof panel along short wall as shown. Use one **72"x45**¹³/16" (**183x116.4**cm). Substitute 2 glass panels for glass extender.

7/8"

(.3cm)

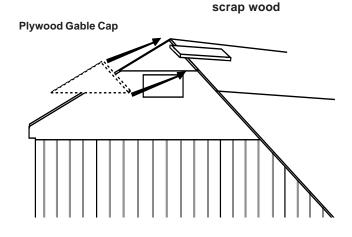

Installing Gable Trim

	JB KN HN	Gable Trim Gable Trim	1 x 4 x 42⁵/8" 1 x 4 x 87 ⁷ /8" 1 x 3 x79⁵/16"	2 x 10 x 130cm 2 x 10 x 223.2cm
□ 2 □ 2 □ 2		Gable Trim Plywood Gable Cap Soffit End Cap		2 x 7.6 x 201.4cm 24 x 74cm 20x10x19cm

- **10A.** Place **Plywood Gable Cap** flush to top of roof panel.
- *Hint* Use a scrap piece of wood to help align to top of roof

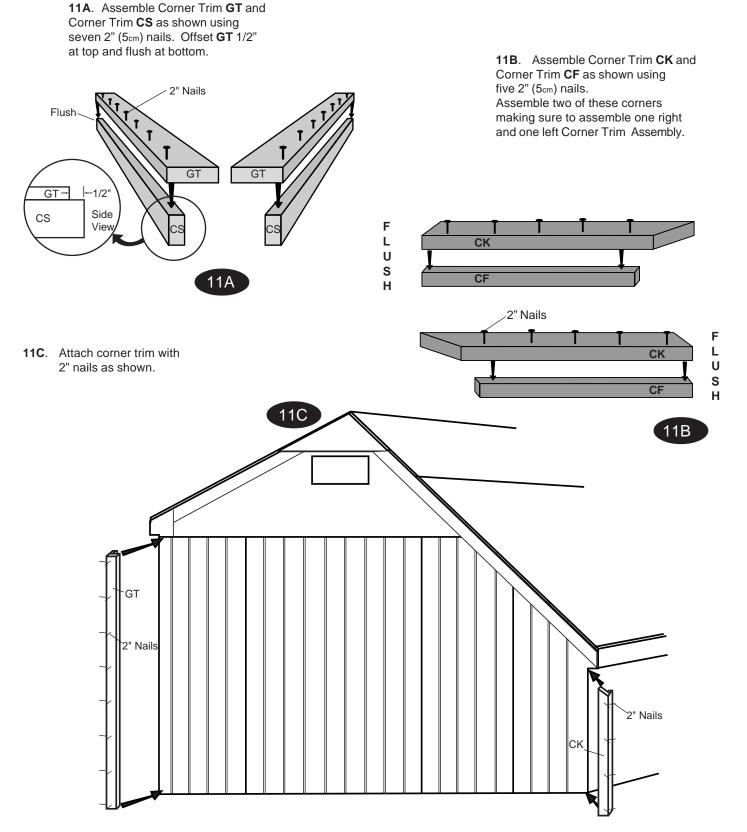

Secure **Plywood Gable Cap** in place using seven $2^{"}$ (5cm) nails.

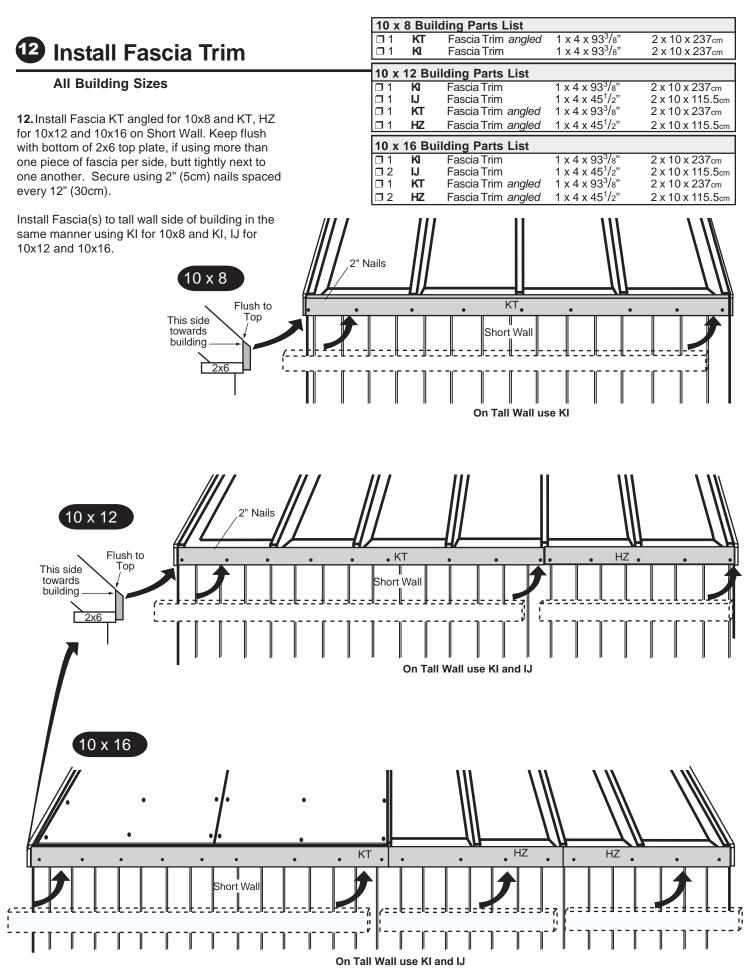

10A

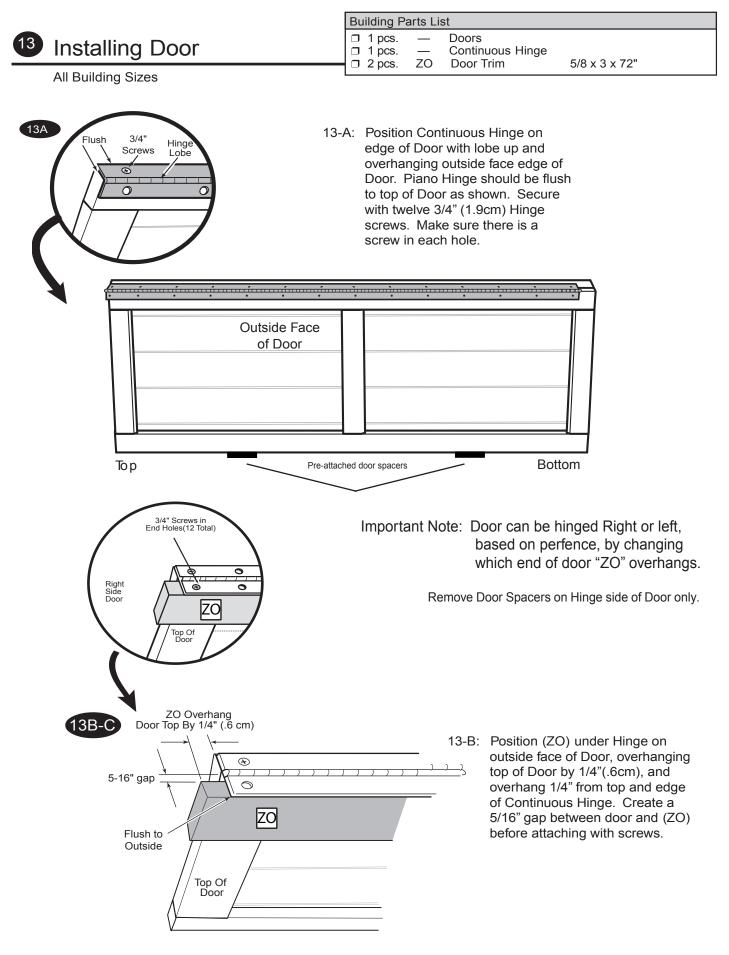

Install Corner Trim	□ 2 □ 2 □ 2 □ 2 □ 2	Corner Trim w/angle Corner Trim Corner Trim Corner Trim	1 x 3 x 38 ¹ /2" 1 x 3 x 71 ¹ /2" 1 x 2 x 72" 1 x 2 x 35 ¹ /4"	2 x 6 x 98cm 2 x 6 x 181.6cm 2 x 5 x 183cm 2 x 5 x 89cm

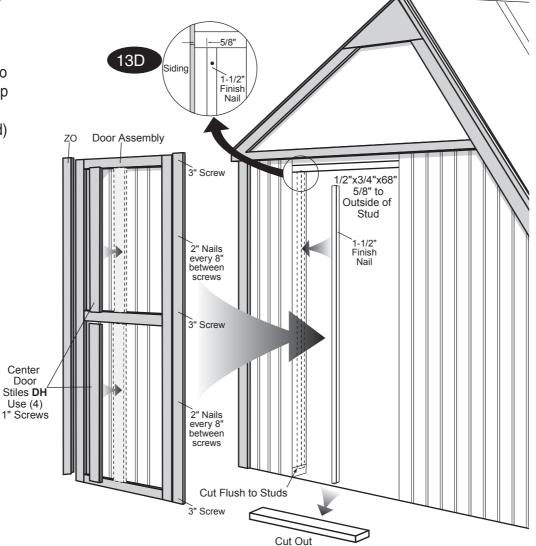

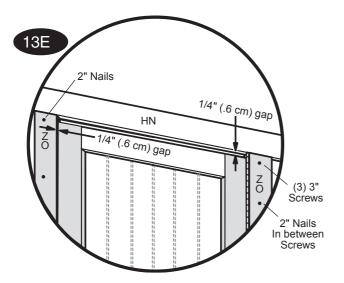

13-D:Cut bottom plate in door opening flush to studs. Install 1/2 x 3/4 x 68" Door Stop with 1-1/2" finish nails. Keep 5/8" to outside of stud and keep 1/2" side to stud. Use wood glue (not included) for added strength.

Install Door Stiles (DH) with 1" screws to the center of the Doors.

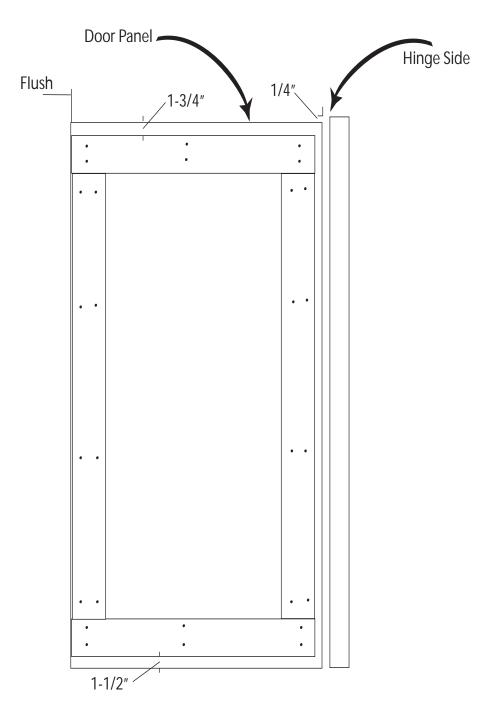

13-E: With two people lift and position Door centered left and right in door opening on Door Wall with Door Trim (ZO) against gable trim (HN) or butting to 2x6 overhang on tall wall. Note: 1/4" (.6 cm) overhang at top of Doors. Connect Door Trim (ZO) to Building with three 3" (7.5 cm) screws as shown. Install (ZO) to side of Door. Butt to (HN) on 2x6 overhang and butt to door spacers and nail with 2" nails. Remove Door Spacers at this time and check door operation then finish nailing hinge (ZO) with 2" nails.

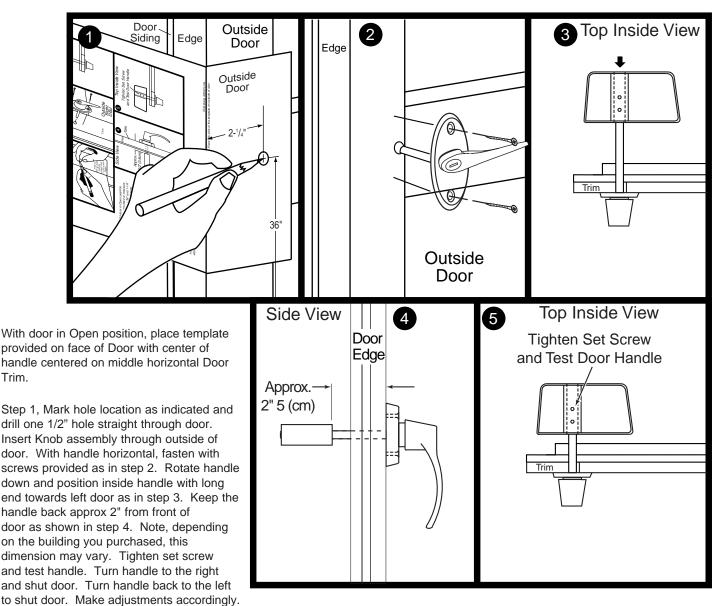

13-F: Attach door stiffeners using 1" screws (28 places)

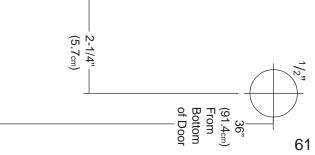

Applying Door Handle

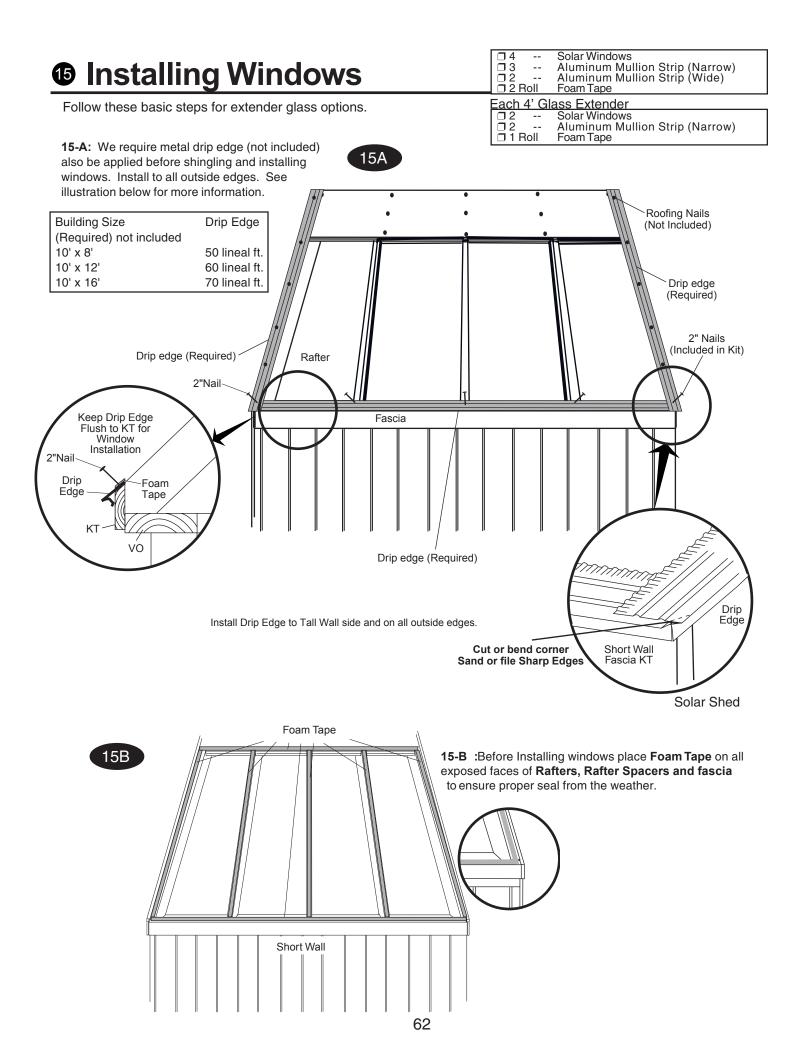

Door Handle Installation

Fold along dotted Line. Place this side of the template on outside of door

Trim.

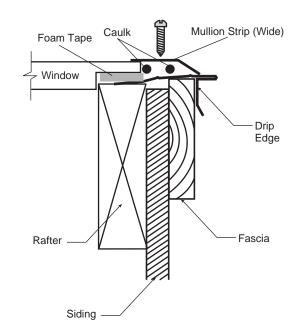

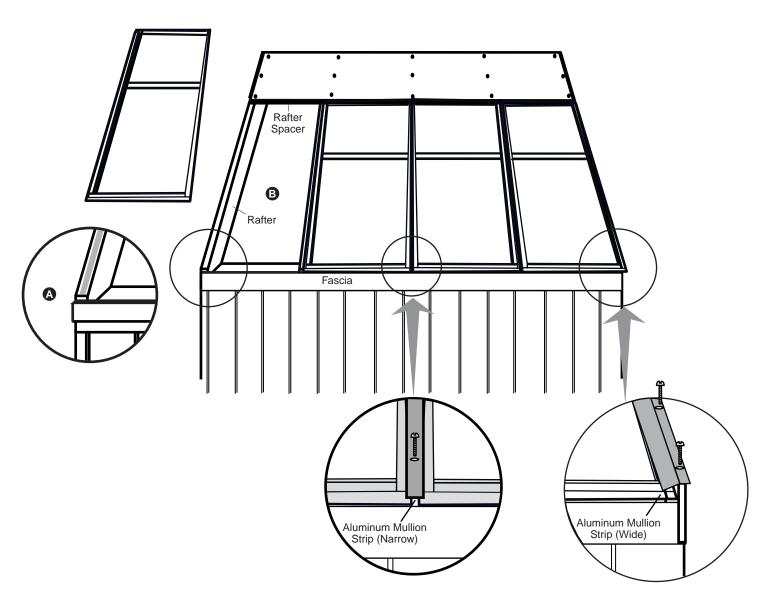

15-C: Place windows in opening between rafters, then secure in place using **Mullion Strips** (Wide to the outside & Narrow to the inside). Mullion Strips will cover outside edges of the window flange and the pan head screws will pass through the mullion strip, between the window flanges into the center of the rafters.

Use one $1^{1}/4^{2}$ (3cm) pan head screw for each hole in all mullion strips and tighten snugly.

Do Not Over Tighten Screws!

15C

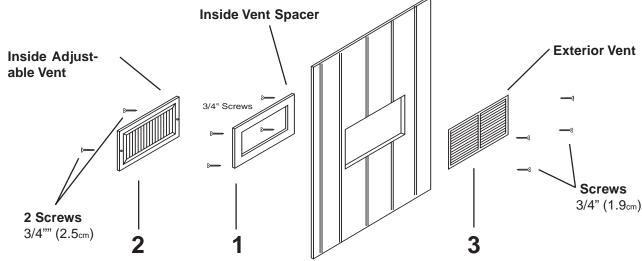

Installing Vents

□ 4	 Adjustable Vents	6 x 12"	15 x 30.5cm
□ 4	 Exterior Vents	8 x 16"	20.3 x 40.6cm
□ 4	 Interior Vent Spacer	9 x 15"	23 x 38cm

16. Install **vents** in sequence shown 1 through 3. Screw in place with four 3/4"(2_{cm}) screws in each part.

Painting, Shingling and General Maintenance

Your Solar Shed, like your home, requires a certain amount of normal maintenance and care.

Nail Inspection:

After assembly is finished, check the entire building inside and out for any protruding nails. Pound over protruding nails into the wood or cut them off flush.

Caulking

Before painting, you must apply quality exterior (paintable) caulk at all horizontal and vertical seams, between the trim and walls, and all around the door trim. Caulk is not included in the kit.

Painting

Your Solar Shed must be painted with two coats of acrylic latex paint or an opaque latex stain within 30 days of assembly. In order to ensure long life all exposed edges of the exterior siding panels and inside of doors must be sealed. The bottom edges are most important. Periodic refinishing, as weather conditions demand, is also necessary. Paint is not included in the kit. You will need:

	Exterior Paint or Solid Stain	Exterior Paint or Solid Stain
Building Size	(for Trim)	(for Sides)
10' x 8'	1 quart	1 ¹ / ₂ gallon
10' x 12'	1 ¹ / ₂ quart	2 gallon
10' x 16'	2 quart	3 gallon

If you intend to use the Solar Shed as a greenhouse, you must paint the inside of the building as well as the wood floor (provided your building has a wood floor).

	Interior Paint or Solid Stain	Interior Paint or Stain
Building Size	(for Walls)	(for Floor)
10' x 8'	1 gallon	1 ¹ / ₂ quart
10' x 12'	1 ¹ / ₂ gallon	2 gallon
10' x 16'	2 gallons	3 gallon

Shingling

Your Solar Shed must be shingled. When shingling, follow manufacturer's installation instructions. Shingles and fasteners are not included in the kit. You will need:

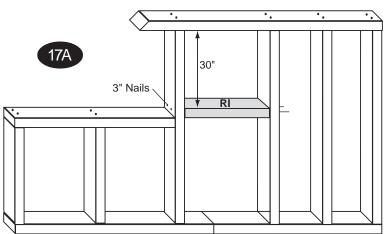

Building Size	Shingles (Required)	Drip Edge (Required)
10' x 8'	3 bundle	50 lineal ft.
10' X 12'(Solid Roof Extender)	5 bundle	60 lineal ft.
10' X 16'(Solid Roof Extender)	7 bundle	70 lineal ft.

Installation of Optional Large Square Window (not included)

I.D.	Description	Size	CM	Qty.
	Window			1
RI	Sill Plates	2 x 4 x 22-1/2"	57.1cm	2
DV	Vertical Trim	1 x 3 x 30-1/4"	76.9cm	2
DT	Horizontal Trim	1 x 3 x 28-3/4"	73.1cm	2
	3" Nails, 2" Nails	s, 1-1/2" Finish Nails		

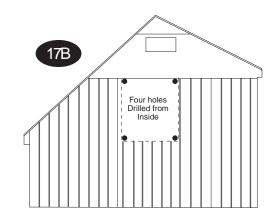

Determine location for optional window. Locating window opening is easiest when done from inside the building.

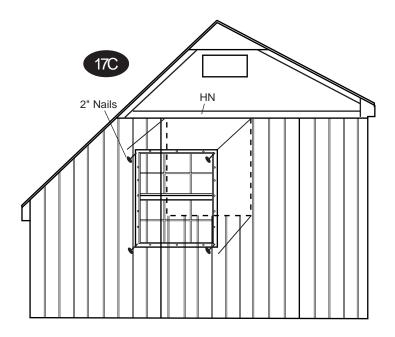

- **17 A.** Arrange and attach part RI as shown. (from Large Square Window kit). Secure to frame using four 3" (6.7cm) nails.
- **17 B.** Drill 4 pilot holes in four corners of window opening. Window cutout size will be 22-1/2" wide by 30" tall. Cut window opening.

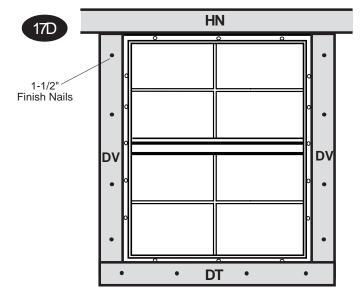

Inside of building

- **17 C.** Level Window in opening and secure with four 2" (5cm) nails.
- 17 D. Attach Window Trim DV and DT as shown, using 1¹/2" (5cm) finish nails. Note: Top DV is not used for Solar Shed. Use the HN from main kit.

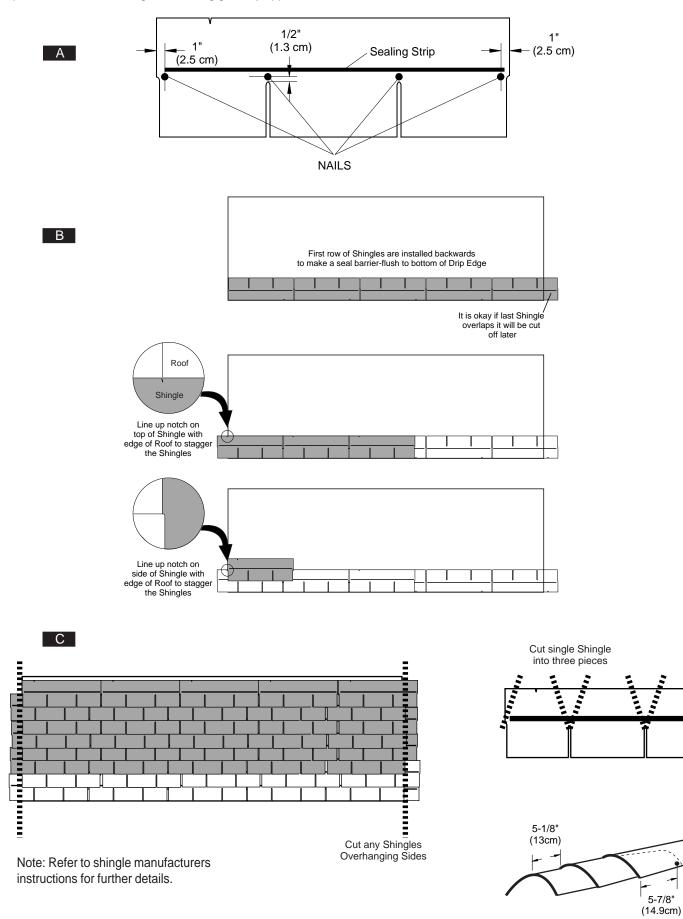

INSTALLING SHINGLES

Important: Make sure shingles overhang glass by approx. 3".

Notes:

WARRANTY

 Backyard Storage Solutions, LLC warrants the following:
 Every product is warranted from defects in workmanship and manufacturing for one year 2 All hardware and metal components are warranted for two years

- 3 4
- All naroware and metal components are warranted for two years. Trim is warranted for 10 years. Waferboard siding and sheathing is warranted for two years. SmartSide[™] siding is warranted for 10 years on all Marco series buildings and 15 years on all Premier Series buildings. Timber series buildings' siding and trim are warranted for 10 years. Solar Shed windows are warranted for 1 year. 5
- 67
- Cedar lumber is warranted for 15 years. 8.
- 9 Cedar doors and Cedar Garden Center are warranted for 10 years. 10. Metal roof is warranted for 25 years.

Backyard Storage Solutions, LLC will repair, replace or pay for the affected part. In no event shall Backyard Storage Solutions, LLC pay the cost of labor or installation or any other costs related thereto. All warranties are from date of purchase. If a cash refund is paid on an affected part, it will be prorated from the date of purchase.

CONDITIONS

5.

- The warranty is effective only when: 1. The unit has been erected in accordance with the assembly instructions. 2
- The unit has been properly shingled and painted or stained and reasonably and regularly maintained thereafter. 3
 - The failure occurs when the unit is owned by the original purchaser. Backyard Storage Solutions, LLC has received the warranty registration card within thirty (30) days of purchase and notification of the failure in writing within the warranty period specified above
 - Backyard Storage Solutions, LLC has had reasonable opportunity during the sixty (60) days following receipt of notification to inspect and verify the failure prior to commencement of any repair work.

REQUIREMENTS

Storage Buildings & Playhouses To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit; shingle the roof and paint or solid-colored stain the siding using 100% acrylic latex exterior product with a include all exterior walls and all sides and all edges of doors.

Gazebos, Pergolas & Timber Buildings

To validate your warranty, it is necessary to properly maintain your Backyard Storage Solutions, LLC unit. This includes treating all of the exposed cedar and pine surfaces on your gazebo or timber building with an exterior grade wood preservative, an exterior oil-based semi-transparent stain, an acrylic latex exterior paint or an acrylic latex solid color exterior stain within 30 days of assembly and as needed thereafter to maintain your warranty.

Keep vegetation trimmed away from building and make sure siding panels and trim do not come in contact with masonry or cement. The minimum ground clearance for siding must be one half inch (½ inch) from concrete slab or two and one half inches (2 ½") from the ground when building is erected or constructed on a treated wood floor kit. Water from sprinklers must be kept off unit. In no event will Backyard Storage Solutions, LLC be responsible for any indirect, incidental, consequential or special damages nor for failure(s) that are caused by events, acts or omissions beyond our control incidental, constructed to, misuse or improper assembly, improper maintenance (which eventually leads to rot or decay) and acts of God. Backyard Storage Solutions, LLC will not be held responsible for any labor costs incurred to construct your unit. This warranty gives you certain specific rights that vary from state to state

 CLAIM PROCEDURE.

 To make a claim under this warranty, you can either call 1-888-827-9056 or prepare a letter. Please have ready the information below when you call or include the information when writing:

 1.
 The model and size of the product.

 2.
 A list of the part(s) for which the claim is made.

 7.
 Dest of surphase of the Pockward Storage Solutions. LLC item, as shown on the original invoice.

- Run code, as listed on the yellow warranty card enclosed in the product package.
- Mail the above information to: Backyard Storage Solutions, LLC
 - - Attn: Customer Service 1000 Ternes Monroe, MI 48162

WARRANTY TERMS MAY VARY OUTSIDE THE U.S.A. IMPORTANT: This is your warranty certificate. Please complete and mail your warranty card to properly validate your warranty.

Backyard Storage Solutions, LLC le garantiza a Ud. que:

- Cada producto no tiene defecto de mano de obra ni de manufactura por un período de un año Cada producto no tiene defecto de mano de obra ni de manufactura por un periodo de un año. La ferreteria y los componentes de metal están garantizados por dos años. La moldura está garantizada por 10 años. La covertura y el entablado están garantizadas por 10 años para los edificios Marco Series, y por 15 años para los edificios Premier Series. La covertura y la moldura de los edificios Timber Series están garantizadas por 10 años. Las ventunas del Solar Shed están garantizada por 15 años. La madera de cedro está garantizada por 15 años. La madera de cedro está garantizada por 15 años. 2 Garantía Limitada 3 Condicional * 4. 5. 6 7
- 8.
- Las puertas del cedro y el Centro de jardin del Cedro son justificados durante 10 años. El techo del metal es justificado durante 25 años. 9. 10.

Backyard Storage Solutions, LLC reparará, cambiará o pagará por la pieza afectada. En ningún casa pagará Backyard Storage Solutions, LLC los gastos de instalación o trabajo manual, o cualquieres otros gastos relacionados a eso

Condiciones

- Esta garantía es válida solo cuando:
 La unidad ha sido construida según las instrucciones.
- 2
- 3
- La unidad ha sido cubierta de tejas y pintada de manera correcta y mantenida regularmente. El defecto ocurre mientras la unidad está en la posesión del comprador original. Backyard Storage Solutions, LLC ha recibido la tajeta de garantía del producto en el plazo de 30 (treinta) días después de comprar la unidad y después de la notificación del defecto por escrito, duranteel 4. período de vigencia de la garantía especificada arriba.
- Backyard Storage Solutions, LLC ha tenido una oportunidad razonable, durante los sesenta (60) días después de haber recibido la notificación, para inspeccionar y averiguar la falla o el defecto antes de comenzar cualquiera reparación. 5.

Requisitos Cobertizos de almanacemiento y Casitas de niños

Para dar validez a la garantía, es necesario mantener bien su unidad de Backyard Storage Solutions, LLC: cubrir con tejas el techo, pintar la covertura con un producto 100% de acrílico y de látex para exteriores, usando dos manos de pintura o tinte, como mínimo, en el plazo de sesenta (60) días después de la covertura SmartSide™ y plano, incluyendo todos los puretas y todos los paneles de moldura horizontales y verticales; pinte y selle todos los bordes dispuestos al exterior, los lados y las fachadas del la covertura SmartSide™ y plano, incluyendo todos los muros exteriores y los lados y bordes de las puertas.

Belvederes, Pergolas y Edificios de Madera

Para dar validez a la garantía, es necesario mantener bien su inidad. Eso incluye tratar con un preservativo todos los superficies de cedro y de pino duspuestos al exterior, usando una preservativo para madera, un tinte de aceite semitransparente para exteriores, pintura acrílica de látex para exteriores, o un tinte acrílico de látex de un solo color, en el plazo de treinta (30) días después de construir el edificio, y luego como sea

Mantenga corta toda clase de vegetación cerca del edificio y asegúrese que la covertura y la moldura no toquen ningúna obra de albañería o el cemento. El margen minimo entre el suelo y la covertura debe de ser media pulgada (1/2[°]), con un base de concreto; dos pulgadas y media (2 1/2[°]) cuando se construye el edificio sobre un base de madera (usando un equipo de madera tratada). No se deben usar rociadores cerca de la unidad. En ningún caso será responsable Backyard Storage Solutions, LLC de daños especiales, incidentales, consiguientes o indirectos, ni de fallas causadas por sucesos, hechos u omisiones fuera de nuestro control; eso incluye, pero no está limitado a: el misuso; la construcción incorrecta; cuidado incorrecto (el cual causa, eventualmente, la putrefacción o la descomposición) y acciones de la naturaleza. Backyard Storage Solutions, LLC no será responsable de ningún gasto de instalación incurrido durante la construcción de la unidad. Esta garantía le de a Ud. ciertos derechos específicos que varían de estado a estado
