

The Chef Pro™ Sink Collection

The Chef Pro Collection of premium stainless steel sinks is designed for professional and other demanding culinary spaces where depth and higher bowl volume are important. The traditional apron design shown to the right offers 10 inch bowl depth with an elegantly tapered, arched front panel. It is available in a single or double bowl 36 inch width style or a single bowl 30 inch width style. The Chef Pro Collection includes several others in sizes and configurations in conventional undermount style.

With Artisan Sinks, the finish of its premium stainless steel simply can't be matched. The high-luster satin finish is durable, stylish and practical ... portraying the latest trends in traditional kitchen and pantry design. The sinks in the Chef Pro Collection offer a remarkable 16 gauge thickness and 304 commercial grade stainless steel. The superior craftsmanship provides long-lasting beauty, while providing resistance to both stains and corrosion. All undersurfaces of these sinks are covered with Artisan's proprietary V-Therm Shield™, a dense coating that provides unsurpassed sound deadening and thermal retention qualities. The nine styles making up the Chef Pro Collection offer a wide selection, delivering designer styling, popular sizing, and best of all... affordability.
