PENDANT ELEMENTS

GENERAL PRODUCT INFORMATION:

This product is ETL listed and suitable only for indoor dry locations and approved for use at any height above the finished floor.

This product must be used with Tiella Lighting system only.

Adjust The Fixture Height

- 1** Back out (**DO NOT REMOVE**) the #6-32 set screw on tip of the connector with the provided 1/16 Allen wrench.

- 2** Back out (**DO NOT REMOVE**) the #6-32 oval head set screw on the cylindrical connector with the provided 1/16 Allen wrench.
- 3** Pull the coaxial cable out.

- 4** Cut the coaxial cable to the desired length.
- 5** Gently twist the end of the coaxial cable between thumb and forefinger.

- 6** Feed and push the coaxial cable into the cylindrical connector. The coaxial cable will come to a stop point after being inserted 3/4" into the cylindrical connector.

- 7** Keep pushing the coaxial cable into the connector while rotating the connector to ease feeding the inner wire into the tip of the connector. The outer wrapped wire will start wrinkling while being inserted another 1/2" into the connector.

- 11** Pull the coaxial cable toward the fixture to smooth the wrinkles.

- 8** Look into the sight hole on the top of the connector to make sure that the inner wire is contacting the end of the connector.
- 9** Hold the coaxial cable in place and tighten the #6-32 set screw on tip of the connector with the provided 1/16 Allen wrench. ***Make sure that this set screw connection is tight.***

- 10** Tighten the #6-32 oval head set screw on the cylindrical connector firmly.

Installing the Lamp

CAUTION: To reduce the risk of a burn or electric shock during relamping, disconnect the power to the fixture.

NOTE: Use only your fingers and a soft cloth to replace the lamp.

2A

- 1** Hold the glass with one hand and loosen the two #4-40 set screws on socket cover with the 0.05 Allen wrench.

2B

- 2** Remove the glass and MR16 lamp.

2C

Use **MAX** 50 Watt, MR16 Front Cover Halogen Lamp.

- 3** Place the glass onto the new MR16 lamp and push the lamp pins all the way into the socket.

2D

- 4** Hold the glass in place and tighten the two #4-40 set screws on the socket cover with the 0.05 Allen wrench.

IMPORTANT SAFETY INSTRUCTIONS

To reduce the risk of fire, electrical shock, exposure to excessive UV radiation, or injury to person:

- Use this fixture indoors only.
- Do not look directly at the lighted lamp.
- Do not remain in light if skin feels warm.
- Risk of fire: Use only the type of lamp and maximum wattage indicated in this instruction manual.
- Never cover the halogen lamp with anything other than a Tiella lamp shield and never place flammable material close to your fixture.
- Never turn the fixture on and off by connecting and disconnecting the halogen lamp.
- Do not touch the fixture shades or lamp shield while the fixture is on. These surfaces may be HOT.
- To avoid glare in child's eyes, hang the fixture 18" above the table.

Halogen Lamp General Information

- A new halogen lamp may smoke slightly when it is used for the first time. This is perfectly normal; the protective coating is simply being vaporized.

Two Tips For Prolonging Halogen Lamp Life

- First avoid touching the lamp with bare hands during installation. Any contaminant, even the oil from your hands can deteriorate the lamp. Rubbing alcohol can be used to remove any contaminant.
- Second, do not run the lamps at full power when you do not need to. However, if dimming the fixture for an extended period of time, occasionally bring the light up to full brightness for a few minutes to complete the halogen cycle.
