## 8. EXPOSURE CONTROLS

PPE: Outer garments may be desirable if exposed to dust. Personal protective equipment not needed around finished product.  
Inhalation: Wear particulate filter and/ or air purifying respirator when allowable exposure limits are exceeded.  
Skin: Wear gloves to minimize potential mechanical irritation from handling products.  
Eye: Wear safety glasses or goggles where high dust levels are encountered.  
Ingestion: Do not eat or drink while handling product.  
Ventilation: Use proper ventilation.  
Engineering Controls: Minimize practices that generate dust. Use general mechanical and/ or local exhaust ventilation to keep dust concentrations below exposure guidelines.  
Work/Hygienic Practices: Ensure skin where product is applied is clean. The moisture from the product will heighten any skin sensitivity to those individuals who are normally sensitive to wet clothing.
