

How to care for your Eurø Style furniture

Eurø Style furniture will look new for years with a minimum of care because it's made that way. However, if messy things happen, a little bit of the right kind of attention should solve almost any problem.

Powder Epoxy Coated or Chromed Steel Finishes:

Just wipe it with a damp cloth

Mesh Seats & Backs:

Same. The damp cloth should be enough.

Molded Epoxy, Polypropylene, or Vinyl:

Try the damp cloth, and if that doesn't do it, use a commercial vinyl cleaner.

Be sure to follow the product directions.

Leather:

Start with a commercial leather cleaner, and if you wish, follow up with a leather preserver.

Use them according to the product directions.

Wood:

Commercial wood cleaners and preservers work fine if you follow the product directions.

Fabrics:

Your best bet is commercial dry cleaning.

Glass:

Windex or similar glass cleaners are all you need. Try not to squirt it on other surfaces.
