

Two tops table

I made a mistake, I fixed the table-top under the supporting bars instead of on top, and found a space which was always there but was never seen, I created a lid to cover and to hide and change a few hundred years of classic table making.

Technical

The Two tops table will require some assembly before use. The legs will need attaching which you will find inside the box with the table top. To attach the legs simple align and turn the legs in a clockwise motion until the legs no longer turn. Repeat this for all four legs. It is best to do this whilst the table top is still packaged and upside-down. The tables are heavy items and may require more than one person to manuver. If you are unsure of anything please contact our product development team for advice.
