

INSTALLATION AND SAFETY INSTRUCTIONS

IMPORTANT SAFETY INSTRUCTIONS

- Be sure the electricity to the system you are working on is turned off; either the fuse removed or the circuit breaker set at off.
- Use of other manufacturers components will void warranty, listing and create a potential safety hazard.
- If you are unclear as to how to proceed, contact a qualified electrician.
- For use with the 120V Transitions track series by Sea Gull Lighting.
- When only one end or intercept connector is connected to the track, do not leave the other end live.
- Be sure to install the rail system where it can not be shorted out by conductive materials.
- Make sure all connections are tight.
- Save these instructions.

INSTALLATION

1. Loosen grounding screws (C) with phillips head screwdriver. Install rail (A) fully into joiner (B) making sure contacts (D) are aligned with conductors on rail (A).
2. Slide next section of rail (A) into rail joiner (B) making sure contacts (D) are aligned with rail conductors.
3. Tighten grounding screws (C).
4. Please be sure to support rail maximum of 6" on either side of rail joiner (B).
