

**IMPORTANT  
TURN OFF THE POWER AT THE MAIN FUSE  
OR CIRCUIT BREAKER BOX  
BEFORE STARTING INSTALLATION**

Carefully unpack and identify all parts before assembly. Bulb not included.

1. Follow enclosed supplement installation instructions for electrical and fixture installation onto house outlet box. If you do not have an outlet box at desired location to attach the fixture than hire a qualified electrician to create one.

NOTE: At one end of fixture there is a strip surrounding inside of frame. This end of fixture has to be installed onto wall facing down, otherwise the glass shade can not be supported.

2. Install socket cover onto sockets by slipping from above until it rests.
3. Install bulb (not included). See relamping label located near socket area for type and maximum allowed wattage.
4. Carefully slip glass shade at inside of frame until it rests at bottom strip.
