

**IMPORTANT**  
**TURN OFF THE POWER AT THE MAIN FUSE**  
**OR CIRCUIT BREAKER BOX**  
**BEFORE STARTING INSTALLATION**

**Carefully unpack and identify all parts before assembly. Bulb is not included.**

1. Follow enclosed supplement installation instructions for electrical and fixture installation onto house outlet box. If you do not have an outlet box at desired location to attach the fixture than hire a qualified electrician to create one.

**NOTE:**

A. Note correct position of fixture plate from left diagram before mounting onto the wall.

B. After fixture plate installation onto wall and when applying silicone sealant (not included) around perimeter of fixture plate, make certain to apply only minimal amount of silicone (specially top and bottom side) necessary to seal any gap between fixture plate and wall.

2. Install lamp (not included). See relamping label located near socket area for type and maximum allowed wattage.

3. Install frame onto fixture plate:
  - A. Hook top of frame onto top edge of fixture plate. Make certain it's securely hooked.
  - B. Secure frame onto bottom of fixture plate by fastening head less screw. Use provided hex key to tighten.
